NATIONAL ENERGY BOARD ORAL HEARING FOR WYNDWOOD PIPELINE EXPANSION PROJECT BEGINS ON JUNE 6

The National Energy Board (NEB) will hold an oral hearing on Tuesday, June 6 at 9 a.m. (local time) on whether or not the Wyndwood Pipeline Expansion Project should be approved for construction and operation. The hearing will be held at the Pomeroy Inn & Suites in Chetwynd, BC. The public is welcome to attend.

The Wyndwood Pipeline Expansion Project is an application from Westcoast Energy Inc. (doing business as Spectra Energy Transmission) to build and operate 27 kilometres of natural gas pipeline and associated facilities southwest of Chetwynd, BC. This proposed project is a loop of Westcoast's existing Fort St. John Mainline.

The NEB Hearing Panel will hear from three intervenors including two Indigenous groups and a local landowner. The schedule of speakers, which is subject to change, is available on the NEB's website.

Once the oral statement portion of the hearing has finished, Westcoast and the 13 individuals and groups who have been granted Intervenor status in the hearing can

ask questions about the written evidence filed by the Applicant and other Intervenor. The hearing will conclude with oral final argument.

The hearing is scheduled to run until Wednesday. Those unable to attend the hearing in person can access both a live audio feed and a daily transcript at www.neb-one.gc.ca/wyndwood.

Quick Facts

The NEB received 16 applications to participate and granted Intervenor status to 14 applicants and Commenter status to one applicant. One application to participate was turned down. One Intervenor withdrew from the hearing process.

The NEB has made up to \$250,000 in funding available to support meaningful participation by Intervenor in the hearing process.

As this project falls under section 58 of the National Energy Board Act, the NEB is the final decision maker.

PENTANOVA ENERGY CORP. ANNOUNCES NAME CHANGE

PentaNova Energy Corp. (the "Company") (TSXV: PNO), announces that it has changed its name from PMI Resources Ltd. to "PentaNova Energy Corp." and has continued its corporate jurisdiction to British Columbia from Alberta, all as approved by the shareholders

of the Company at the Annual and Special meeting (the "Meeting") held on May 29, 2017. The trading symbol for the Company under its new name will change to "PNO" effective June 5, 2017.

Trading in the common shares of the Company has been halted in accordance with the policies of the Exchange and will remain halted until such time as all required documentation has been filed with and accepted by the Exchange in connection with the Company's previously announced Patagonia acquisition and permission to resume trading has been obtained from the Exchange.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Forward-Looking Information

Except for the statements of historical fact, this news release contains "forward-looking information" within the meaning of the applicable Canadian securities legislation that is based on expectations, estimates and projections as at the date of this news release. The information in this news release about the completion of the transaction described herein, and other forward-looking information

includes but is not limited to information concerning the intentions, plans and future actions of the parties to the transactions described herein and the terms of such transaction.

Factors that could cause actual results to differ materially from those described in such forward-looking information include, but are not limited to, risks related to the Company's or Patagonia's inability to satisfy a condition precedent to the completion of the transaction (including obtaining necessary regulatory approvals), other risks related to completion of the transactions and risks related to the inability of either of the Company or Patagonia to perform their respective obligations under the transactions.

The forward-looking information in this news release reflects the current expectations, assumptions and/or beliefs of the Company based on information currently available to the Company. In connection with the forward-looking information contained in this news release, the Company has made assumptions about the Company's ability to complete the transactions and Patagonia's ability to complete the acquisition of the Assets. The Company has also assumed that no significant events will occur outside of the Company's normal course of business. Although the Company believes that the assumptions inherent in the forward-

MEDIA ADVISORY - MINISTER CARR TO TRAVEL TO CHINA

Canada's Minister of Natural Resources, the Honourable Jim Carr, will travel to China from June 5 to 9, 2017, to build on Canada's and China's strong trade and investment relationship and to promote Canada's resource products and expertise, including forest products, energy and clean technologies. The Minister will be accompanied by a delegation comprising senior industry representatives from Canada's forest, energy and clean technology sectors, as well as provincial representatives and Indigenous leaders.

Minister Carr will deliver a keynote address at Canada in Conversation, a speaker's series hosted by Canada's Embassy in China; meet with his international counterparts as part of the Clean Energy Ministerial and discuss ways to advance

commitments under Mission Innovation; participate in the launch of the Sino-Canadian Eco-district and open its new Wood Science Centre.

Minister Carr will host a number of roundtables with industry and meet with his Chinese counterparts to advance collaborative efforts on clean energy and pursue trade opportunities to diversify international markets for Canadian resources, including wood products and clean technologies.

For the latest information about the trip, visit our Canada and China web site, which is available in both official languages as well as in simplified Chinese.

ALBERTA PREMIER NOTLEY SET TO ATTEND 49TH YEAR OF GLOBAL PETROLEUM SHOW

Global Petroleum Show (GPS) will welcome upwards of 50,000 registered attendees to Calgary's Stampede Park from Tuesday, June 13 to Thursday, June 15, 2017 for one of the world's largest energy events. The annual show will focus on the 2017 theme of "Experience the Energy", offering attendees the opportunity to connect with clients, suppliers, and potential customers from across the globe, so they can discuss industry trends and collaborate on solution-oriented thought processes. Federal and provincial government representatives will also be present at GPS, including The Honourable François-Philippe

Champagne, Federal Minister of International Trade. Alberta Premier Rachel Notley is also set to attend the Energy Leaders Forum on the morning of Wednesday, June 14, in addition to representation from Alberta provincial ministers The Honourable Margaret McCuaig-Boyd, Minister of Energy, and The Honourable Deron Bilous, Minister of Economic Development and Trade attending various events throughout the show. Ministers from Saskatchewan, Quebec and other Canadian provinces are also expected to be in attendance.

"We look forward to welcoming Premier Notley to GPS this year and we are grateful for the strong support we are receiving from our provinces and the government of Canada as we welcome hundreds of international ministers and dignitaries to the show. Their presence will certainly serve to amplify our efforts to offer attendees a diverse range of panel discussions, interactive demonstrations and networking opportunities that can help them reposition their businesses in response to the evolution of the energy industry," says Wes Scott, Executive Vice President, dm :: events, organizers of Global Petroleum Show. "We continue to receive positive feedback from exhibitors and attendees about the show as a platform for innovation, thought leadership and a reassuring presence amidst the cyclical nature to the economy. We are proud to be able to offer all in attendance a refreshing global perspective on the importance of remaining competitive, managing costs and building a sustainable oil and gas industry."

GPS 2017 will feature 20,000 unique companies coming together from more than 110 countries and will invite attendees and exhibitors from all industry sectors to ask questions and learn more about the future of the energy industry. With 35 countries presenting in the Country Market Seminar Series, attendees will be invited to learn more about energy sectors in numerous countries, including the Baltics, Australia, China, Japan, Mexico, Argentina, Brazil, the UAE and Ukraine. Governments from around the world will gather to meet investors, service and supply companies, and other foreign governments to share information about the regional appeal of their energy industries.

A variety of educational sessions, with over 100 individual presentations for attendees to garner insight from, will also be a highlight of this year's show. From the Energy Dialogues, new this year, to the Indigenous Conference on Energy and Mining, now in its second year at GPS,

and the many free educational opportunities available, including Clean Technology Seminars, the Take Charge of Your Career Seminar Series and Water Innovation sessions, the 49th year of GPS is set to provide visitors from around the world with an eye-opening experience. The African Oil and Gas Forum will also provide international perspective on potential opportunities for Canadian companies in the oil and gas service sector. These, along with a suite of other new features, will aim to bring attendees and exhibitors closer together by offering a broader understanding of all aspects of the oil and gas industry.

GPS 2017 exhibition hours are Tuesday, June 13 and Wednesday, June 14 from 10 a.m. to 6 p.m., and Thursday, June 15 from 10 a.m. to 5 p.m.

Media are required to pre-register in order to obtain a show badge for the event and will need to provide accreditation (a piece of photo identification and an official business card) upon arrival at the Press Office, located in Room 101 and 102 beside Hall D in the BMO Centre. For further information on GPS, to pre-register or to inquire about attendance, please visit <http://globalpetroleumshow.com/>.

40-YEAR EXPORT LICENCE ISSUED TO WOODFIBRE LNG

Liquefied natural gas (LNG) is greener than any other fossil fuel and more affordable than many renewables, which means it will play a significant role as we transition to a clean energy future. Canada is the world's fifth-largest producer of natural gas, and creating the conditions to open access to global markets will help to create good, middle-class jobs for Canadians.

Today, while speaking at the Canadian Embassy in China, the Honourable Jim Carr, Canada's Minister of Natural Resources, announced that the Government of Canada has approved a 40-year natural gas export licence to Woodfibre LNG Limited for its proposed facility in Squamish, British Columbia.

The Government's approval of this licence will help Canada achieve international market access for its natural gas by providing certainty to investors on their long-term access to natural gas while strengthening investment and planning decisions in the industry.

The National Energy Board (NEB), which regulates the import and export of natural gas, approved Woodfibre's application on April 6, 2017. The Government reviewed and supported

Sign up early as these prices will not last!

the NEB's recommendations. Quick Facts

Canada has about 300 years' worth of marketable natural gas reserves, estimated at 1,566 trillion cubic feet, or 44 trillion cubic metres, which puts it in the top tier globally.

To date, the Government of Canada has issued LNG export licences to 24 projects.

In October 2015, the Squamish Nation Council voted to approve an Environmental Assessment Agreement for the Woodfibre LNG project and issued an Environmental Certificate to the company.

The Woodfibre LNG project will create about 100 full-time jobs at the facility during operation and about 650 jobs each year during an estimated two-year construction period.

Q u o t e s

"We know there is tremendous demand for natural gas, especially in the fast-growing countries of Asia. The approval of Woodfibre LNG's 40-year export licence provides certainty for investors while creating jobs for Canadians as the world moves toward a low-carbon future. This project also underscores the significance of working together with First Nations communities, as it will lead to environmental protection and economic benefits for the Province of British Columbia and the Squamish Region."

Jim Carr, Canada's Minister of Natural Resources

ENGAGEMENT ON ENERGY EAST HEARING DESIGN

The National Energy Board (NEB) has launched an initiative to gather input from Indigenous peoples and the public to help shape the hearing process and other engagement activities for the Energy East and Eastern Mainline projects. The comment period ends on 15 July 2017.

These activities will be led by a team of four Board Members who are independent from the Hearing Panel: Alain Jolicœur, Wilma Jacknife, Damien Côté and Ronald Durelle. They will be gathering comments by meeting with Indigenous peoples and through a new online engagement platform.

The four Board Members hope to engage with many of the more than 200 groups of indigenous peoples who may be impacted by the projects. One of the key aspects of these discussions will be to identify the best ways to collect oral traditional evidence.

Relevant findings from these

engagement efforts will be filed on the official record for the Hearing Panel to consider as they design the Energy East and Eastern Mainline hearing process.

The expanded engagement activities announced are in keeping with the Government of Canada's Interim Measures for Pipeline Reviews.

Quick Facts

The NEB is committed to hearing from indigenous peoples in a way that respects their values and traditions. Indigenous peoples have an oral tradition for sharing lessons and knowledge from generation to generation. Since this information cannot always be shared adequately or appropriately in writing, the NEB is inviting Indigenous peoples to provide oral traditional evidence as has been done in previous hearings.

On 31 May 2017, a comment period on documents to establish the scope of the assessment for the Energy East and Eastern Mainline projects ended.

Energy East is a proposed 4,500-kilometre pipeline that would carry 1.1 million barrels of crude oil per day from Alberta and Saskatchewan to refineries in Eastern Canada and a marine terminal in New Brunswick.

The Eastern Mainline Pipeline is a proposal to build approximately 279 kilometres of new gas pipeline and related components, beginning near Markham, Ontario and finishing near Brouseville, Ontario.

CANADIAN NUCLEAR TECHNOLOGY CONTRIBUTES TO CHINA'S CLEAN ENERGY GROWTH PLANS

Deepening Canada's clean technology relationship with China

is a priority for the Government of Canada, and Canada's nuclear industry can play a key role in helping China meet its climate change objectives while creating new business opportunities and jobs for middle-class Canadians.

Canada's Minister of Natural Resources, the Honourable Jim Carr, today welcomed the signing of an agreement between Canada's SNC-Lavalin and China National Nuclear Corporation to implement advanced fuel technology in the two CANDU reactors currently operating in China. The technology will enhance the operating life of the reactors, improve reactor safety margins and allow for the introduction of recycled uranium fuel into the reactor starting in 2018.

The Government of Canada recognizes the enormous potential of the Chinese market and is making

concerted efforts to show that Canada is open for business and ready to take its trade relationship with China to the next level. Minister Carr is leading a delegation of more than 50 representatives from Canadian energy, forestry and clean technology companies, Indigenous organizations and provincial governments on a seven-day mission to China to generate new trade and investment opportunities and showcase the diversity of Canadian talent, innovation and expertise.

The nuclear supply agreement announced today is another step forward in a relationship between SNC-Lavalin and Chinese partners that will continue to grow as China pursues plans to build 100 or more new reactors in the coming decades.

Founded in 1911, SNC-Lavalin is one of the leading engineering

and construction groups in the world. With offices in over 50 countries and about 35,000 employees, SNC-Lavalin teams provide engineering, construction and management services to clients in oil and gas, mining and metallurgy, infrastructure and power.

Q u o t e s

"Canada is known around the world as a stable, reliable and cost-effective supplier of energy resources, technology and services, and our government will continue to promote our expertise in clean and safe nuclear power. Canada's commitment to expanding its energy partnership with China includes a focus on nuclear energy, an area in which we have enjoyed long-standing and fruitful relations."

Jim Carr
Canada's Minister of
Natural Resources

"SNC-Lavalin is pleased to take the next step forward toward alternate fuels for existing CANDU reactors. Our technology advancements, coupled with our partnerships with the Chinese nuclear industry will ensure safe and efficient low-carbon energy for China for decades to come."

UGE ANNOUNCES \$1,800,000 BOUGHT DEAL PRIVATE PLACEMENT

UGE International Ltd. (TSX-V: UGE) (the "Company" or "UGE"), a leader in renewable energy solutions for the commercial and industrial sector, is pleased to announce that it has entered into an agreement with a syndicate of Underwriters led by Canaccord Genuity Corp. (collectively, the "Underwriters") pursuant to which the Underwriters have agreed to purchase 3,000,000 units (the "Units") from the Company at a price of \$0.60 per Unit on a bought deal private placement basis for aggregate gross proceeds of \$1,800,000 (the "Offering").

Each Unit will consist of one common share of UGE (a "Common Share") and one-half of one warrant to purchase Common Shares (each whole warrant, a "Warrant"). Each Warrant will entitle the holder to purchase one Common Share of the Company at a price of \$0.80 for a period of 24 months following the closing of the Offering.

The Company has also granted the Underwriters an option to purchase up to an additional 450,000 Units, for aggregate gross proceeds of up to an additional \$270,000 to cover over-allotments, exercisable in whole or in part at any time until 48 hours prior to the Closing Date (as defined below).

The gross proceeds from the sale of the Units will be used for expansion plans concerning the Company's business and for general corporate and working capital purposes.

The Common Shares and Warrants issuable pursuant to the Offering will be subject to a statutory hold period lasting four months and one day following the Closing Date (as defined below).

This news release does not constitute an offer to sell or a solicitation of an offer to sell any of the securities in the United States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act") or any state securities laws and may not be offered or sold within the United States or to U.S. Persons (as defined under the U.S. Securities Act) unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

The closing of the Offering is expected to occur on or about June 27, 2017 (the "Closing Date"). The Offering is subject to certain conditions including, but not limited to, the receipt of all necessary regulatory and stock exchange approvals, including the approval of the TSX Venture Exchange.

About UGE

UGE delivers immediate savings to businesses through cleaner electricity. We help commercial and industrial clients become more competitive through the low cost of distributed renewable energy. With over 330 MW of experience globally, we work daily to power a more sustainable world.

BELLATRIX ANNOUNCES CFO SUCCESSION

Bellatrix Exploration Ltd. ("Bellatrix" or the "Company") (TSX, NYSE: BXE) announces that as part of its succession planning process, Mr. Edward J. Brown, the Company's Executive Vice President, Finance & Chief Financial Officer, will be retiring from the Company, effective June 30, 2017, following more than ten years of service with Bellatrix and its predecessors. The Board of Directors of Bellatrix is pleased to announce that Mr. Maxwell (Max) Lof has accepted the position of Executive Vice President & Chief Financial Officer. Mr. Lof expects to join Bellatrix effective July 1, 2017.

Brent Eshleman, Bellatrix's President & CEO commented, "On behalf of the Board of Directors and management, I want to thank

Mr. Brown for his leadership over the years and wish him well in his future endeavors and retirement." Continuing, Mr. Eshleman said, "Max brings a wealth of direct public company and financial executive experience to our Company. His demonstrated leadership and skill set represent a strategic fit as Bellatrix executes on its long term sustainable growth plan."

Mr. Lof is an established financial executive with over 25 years of experience in progressive financial and senior executive roles including 12 years of direct experience as a CFO in both private and publicly traded companies. Most recently, he was the CFO for an energy focused information technology company, and prior thereto, Mr. Lof was co-founder and CFO for both Surge Energy Inc. and Breaker Energy Ltd., both publicly traded western Canadian focused exploration and production companies. Mr. Lof obtained an MBA from the Southern Methodist University and is a CFA® charterholder.

Bellatrix Exploration Ltd. is a Western Canadian based growth oriented oil and gas company engaged in the exploration for, and the acquisition, development and production of oil and natural gas reserves in the provinces of Alberta, British Columbia and Saskatchewan. Common shares of Bellatrix trade on the Toronto Stock Exchange and on the New York Stock Exchange under the symbol BXE.

BALLARD AWARDED \$18M FOLLOW-ON DEAL WITH BROAD-OCEAN TO SUPPORT DEPLOYMENT OF 400 BUSES AND TRUCKS IN CHINA

Ballard Power Systems (NASDAQ: BLDP; TSX: BLDP) today announced that it has entered into an \$18 million supply contract with Zhongshan Broad-Ocean Motor Co., Ltd. ("Broad-Ocean"; www.broad-ocean.com/en/index.html) to support the deployment of 400 FCveloCity® fuel cell engines integrated into clean energy buses and trucks in key Chinese cities.

The transaction is part of an ongoing program with Broad-Ocean to implement Ballard's leading fuel cell technology in

support of China's ambitious plan to address environmental concerns and advance the adoption of zero-emission vehicles. The complementary addition of fuel cell systems effectively addresses the limitations of stand-alone battery solutions in certain use cases, resulting in growing demand for zero-emission and efficient propulsion systems that provide bus, truck and commercial vehicles with the traditional range and refueling times provided by legacy diesel solutions.

Randy MacEwen, Ballard President and CEO commented, "Today's announcement adds further momentum to our strategy in China's new energy transportation market. This deal provides another critical validation of the rapidly emerging market opportunity in China for the adoption of fuel cell technology to help solve environmental challenges, including air quality. With our strategic partner Broad-Ocean, we are positioning Ballard to successfully address this opportunity and scale our business, while driving down costs to support sustainable long-term demand."

This announcement, together with an \$11 million transaction announced in April, means that Ballard is planning to support Broad-Ocean through the deployment of 600 fuel cell engines having a value of \$29 million, with substantial deliveries expected to be made this year. In addition to these modules for use in strategic demonstration projects in key Chinese cities, Ballard also closed the strategic technology transfer, licensing and supply deal with Broad-Ocean in April, under which Broad-Ocean plans to set up three module assembly operations in China, representing a further \$25 million to Ballard over 5-years.

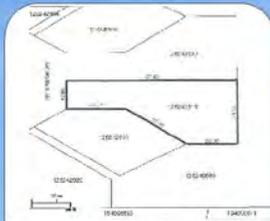

Founded in 1994, Broad-Ocean is headquartered in the City of Zhongshan in Guangdong Province and is listed on the Shenzhen Stock Exchange. The Company is a leading global manufacturer of motors that power small and specialized electric machinery for electric vehicles (EVs), including buses, commercial vehicles and passenger vehicles, and for heating, ventilation and air conditioning (HVAC). Broad-Ocean produces more than 50 million motors annually for customers on 5 continents. On August 18, 2016 Broad-Ocean became Ballard's largest shareholder following an investment of \$28.3 million in Ballard common shares, representing approximately 9.9% of Ballard's outstanding common shares following the transaction.
