CHINA HUAYANG GROUP SELECTS SKYPOWER AS ITS GLOBAL PARTNER TO DEVELOP SOLAR ENERGY PROJECTS AROUND THE WORLD

SkyPower, the world's largest global developer of utility-scale solar energy projects, and China Huayang Economic and Trade Group Co., a Chinese state-owned company under the China Council for the Promotion of International Trade, announced today that it has entered into a world class partnership together.

Huayang has selected SkyPower to be its global partner to develop, build, and operate large utility-scale solar projects in key strategic markets. The partnership combines Huayang's extensive financial capabilities with SkyPower's proven solar expertise to bring new, clean energy and hundreds of thousands of jobs to dozens of countries worldwide. The partnership's mandate and objective is to advance Chinese President Xi Jinping's vision of eliminating barriers in countries under the Belt and Road Initiative.

In speaking about SkyPower's selection by Huayang and the signing of this monumental agreement today in Toronto, SkyPower's President and

Chief Executive Officer, Kerry Adler, said: "SkyPower is so very proud to be part of President Xi's visionary policy of opening up economic and trade routes across the Belt and Road regions, stimulating substantial employment and ensuring economic growth and security along the Road. This partnership clearly demonstrates how Canadian and Chinese companies can work hand in hand, in partnership and unison to leverage each country's respective skills and capabilities to help address and tackle climate change and the other 16 United Nations (UN) Sustainable Development Goals (SDGs), which are critical to humanity and future generations to come."

Weiwen Cheng, Chief Executive Officer of Huayang International Capital Holdings, the international financial arm of the China Huayang Group, commented: "One of the key objectives of the Belt and Road Initiative, which was showcased in Beijing in May 2017 amongst 29 foreign Heads of State, government representatives, and global companies from nations around the globe, was for Chinese companies to seek world leading organizations and build global partnerships and platforms to advance important initiatives like climate change. After Huayang's extensive research

over the past six months of solar developers around the world, Huayang has chosen SkyPower, the world leading global developer of utility-scale solar energy projects, as its global partner to jointly develop and build renewable energy projects along the Belt and Road regions as well in other key selected countries. I believe this unique partnership, which is with a company like SkyPower of the greatest integrity and the highest calibre and professionalism in concert with Huayang, will represent and result in numerous successful renewable energy projects under the Belt and Road Initiative. Huayang intends to use this partnership to help promote trade and requisite financing, which will undoubtedly bring great benefits to the people and communities of these countries. Huayang intends to set up a multi-billion \$US special purpose fund to achieve this important strategic initiative for the projects of this partnership with SkyPower."

"Huayang brings exceptionally strong financial capabilities to this partnership and a clear focus, vision, and strategy, especially under the Belt and Road Initiative. This, coupled with SkyPower's track record and development know-how in the utility-scale solar energy industry, creates a unique opportunity to help

deliver lower costs of electricity to tens of millions of people around the world," added SkyPower's Kelly Yin, Vice President of Asia Strategy.

The agreement was signed on June 7, 2017 at SkyPower's global headquarters, located in Toronto, Canada and represents the first partnership of its kind.

About SkyPower
www.skypower.com

SkyPower is the largest and one of the most successful developers and owners of utility-scale solar energy projects in the world. With roots dating back more than 14 years, SkyPower's global team possesses a vast track record of over 975 years of combined experience in power and large infrastructure projects.

The experienced and accomplished SkyPower team has built, assembled and acquired an extensive pipeline of over 25 GW worldwide – some of which were recently announced to be built in the Middle East, Africa and South Asia over the next five years.

SkyPower's over 30 utility-scale solar Power Purchase Agreements (PPA) and Contracts in aggregate represents billions of dollars' worth of long-term renewable energy sales to leading utilities and governments around the world.

SkyPower is majority owned by CIM Group, a U.S.-based premier full-service urban real estate and infrastructure fund manager founded in 1994 that has systematically and successfully invested in dynamic and densely populated communities throughout North America.

About China Huayang Economic and Trade Group Co., Ltd

China Huayang Economic and Trade Group Co., Ltd. is a state-owned enterprise in China under the China Council for the Promotion of International Trade (CCPIT). CCPIT, as the trade entity of the Chinese government, was founded in 1952 directly under the China State Counsel.

Huayang is an industrial conglomerate that operates in infrastructure construction, commercial real estate, petrochemicals, auto parts, international trade, technology products, and exhibitions, as well as financial service industries. The group holds the majority shares of Xiamen International Bank, Bank of Anshan and Bank of Rizhao.

MINISTER CARR CELEBRATES DEAL BETWEEN WORLD'S LARGEST SOLAR THERMAL COMPANY AND CANMETENERGY DURING CHINA MISSION

Deepening Canada's clean technology relationship with China is a priority for the Government of Canada. Canada can play a key role in helping China meet its green growth demand and climate change objectives while creating benefits for Canadians.

The Honourable Jim Carr, Canada's Minister of Natural Resources, oversaw the signing of a \$5-million agreement today in Beijing between Natural Resources Canada's CanmetENERGY and Jiangsu Sunrain Solar Energy Ltd., the largest solar thermal company in the world.

Through the agreement, CanmetENERGY will provide technical support for Sunrain's development of solar seasonal storage district heating systems in China, from initial screening and feasibility assessment studies to detailed engineering design and performance monitoring of large-scale solar seasonal storage sites.

The agreement is an opportunity to accelerate the commercial development of solar-heated communities across China and the world.

CanmetENERGY is Canada's leading research and technology organization in the field of clean

energy. With three laboratory research centres located across Canada, CanmetENERGY has the expertise and unique facilities to work on projects with key stakeholders to drive cleaner production and use of energy resources. CanmetENERGY is recognized worldwide for experience and leadership in the research, development and demonstration of high solar fraction seasonal storage district heating systems, including at the Drake Landing Solar Community in Okotoks, Alberta. That residential development achieved the world-first solar performance milestone of 100 percent of its space heating coming from solar-only energy generation.

Jiangsu Sunrain Solar Energy was created in 1999 and now has about 6,500 employees. It manufactures solar thermal collectors and solar hot water systems, as well as heat pumps and water filters. The company sees potential for using solar thermal and heat storage to reduce fossil-fuel use in large-scale community district heating systems in China.

Applying CanmetENERGY's technological expertise on larger-scale communities in densely populated China could have a significant positive impact on reduced greenhouse gas emissions.

The Government of Canada recognizes the enormous potential of the Chinese market and is making concerted efforts to show that Canada is open for business and ready to take its trade relationship with China to the next level. Minister Carr is leading a delegation of over 45 representatives from Canadian clean technology, energy and forestry companies, Indigenous organizations and provincial governments on a seven-day mission to China to generate new trade and investment opportunities and to showcase the diversity of Canadian talent, innovation and expertise.

Q u o t e s

"This deal represents a great scientific and technical collaboration between Natural Resources Canada's CanmetENERGY and China. It demonstrates Canada's clean energy technology leadership. Some of the very best minds in the world will work together across oceans, languages and cultures toward a large-scale outcome in China that will significantly benefit everyone with its ultimate goal of huge energy savings and emissions reductions."

Jim Carr
Minister of Natural Resources

CANADIAN ZERO-EMISSION HYDROGEN VEHICLE TECHNOLOGY HEADED TO CHINA

The Government of Canada is committed to deepening its trade relationship with China, creating benefits for Canadians while helping China curb pollution and meet its climate change objectives.

China recognizes the important contribution Canadian technology can make in reducing its urban transit pollution. Today, Canada's Minister of Natural Resources, the Honourable Jim Carr, witnessed the signing of a US\$50 million purchase and licensing agreement between Toronto's Hydrogenics Corporation and China's Blue-G New Energy Science & Technology Corporation, part of Yixing Electric Auto. Through the agreement, Hydrogenics' technology will be integrated in 1,000 zero-emission hydrogen fuel cell

motors on Chinese city buses and the Canadian company will provide professional support services.

The agreement brings together Hydrogenics, a designer, developer and manufacturer of hydrogen fuel cell systems for zero-emission urban transportation, with a Chinese-based electric bus integrator and powertrain maker that is supplying China's electric zero-pollution urban transit market.

The agreement was signed during Minister Carr's seven-day mission to China to generate new trade and investment opportunities and to showcase the diversity of Canadian talent, innovation and expertise. The Minister is leading a delegation of over 45 representatives from Canadian clean technology, energy and forestry companies, Indigenous organizations and provincial governments.

to help Canada's clean technology sector firms grow and expand. The agreement to deploy large-scale fuel cell motors internationally represents a significant opportunity for Canada to become a leading global supplier of low-carbon solutions while creating good-quality jobs for Canadians.

Quick Facts

Hydrogenics is a provider of hydrogen infrastructure and fuel cell solutions headquartered in Mississauga, Ontario. In April 2017, it received \$1.63 million in funding from Natural Resources Canada to construct two public hydrogen stations in the Greater Toronto Area.

Blue-G New Energy Science & Technology Corporation is an experienced China-based hydrogen technology integrator responsible for bringing fuel cell-based powertrain technology to Yixing Electric Auto, an innovative new energy bus OEM for China's electric bus market.

Quote

"The world is increasingly looking to Canada for its leadership and expertise in clean technologies. This agreement is further evidence of the value Canadian clean tech companies bring to help achieve international climate change goals. We are proud to support innovative companies like Hydrogenics that are leaders in their field, creating jobs and increasing Canada's global competitiveness."

Jim Carr
Canada's Minister of Natural Resources

"We are pleased to be working with Blue-G in bringing our world-leading proton exchange membrane (PEM) fuel cell technology to the mobility markets of China. China's strong commitment to solving severe urban pollution issues by electrifying its urban transit systems creates a compelling market for our hydrogen fuel cell technologies. With continuing support from our Canadian government, Hydrogenics is well placed to support China's needs."

PEMBINA PIPELINE CORPORATION DECLARES JUNE 2017 COMMON SHARE DIVIDEND

Pembina Pipeline Corporation ("Pembina" or the "Company") (TSX: PPL; NYSE: PBA) announced today that its Board of Directors declared a common share cash dividend for June 2017 of \$0.17 per share to be paid, subject to applicable law, on July 15, 2017 to shareholders of record on June 25, 2017. This dividend is designated an "eligible dividend" for Canadian income tax purposes.

For non-resident shareholders, Pembina's common share dividends should be considered "qualified dividends" and may be subject to Canadian withholding tax.

For shareholders receiving their common share dividends in U.S. funds, the June 2017 cash dividend is expected to be approximately U.S. \$0.1260 per share (before deduction of any applicable Canadian withholding tax) based on a currency exchange rate of 0.7412. The actual U.S. dollar dividend will depend on the Canadian/U.S. dollar exchange rate on the payment date and will be subject to applicable withholding taxes.

Confirmation of Record and Payment Date Policy

Pembina pays cash dividends on its common shares in Canadian dollars on a monthly basis to shareholders of record on the 25th calendar day of each month (except for the December record date, which is December 31st), if, as and when determined by the Board of Directors. Should the record date fall on a weekend or a statutory holiday, the effective record date will be the previous business day. The dividend payment date is the 15th of the month following the record date. Should the payment date fall on a weekend or on a holiday the business day prior to the weekend or holiday becomes the payment date.

About Pembina

Calgary-based Pembina Pipeline Corporation is a leading transportation and midstream service provider that has been serving North America's energy industry for over 60 years. Pembina owns and operates an integrated system of pipelines that transport various products derived from natural gas and hydrocarbon liquids produced primarily in western Canada. The Company also owns and operates gas gathering and processing facilities and an oil and natural gas liquids infrastructure and logistics business. Pembina's integrated assets and commercial operations along the majority of the hydrocarbon value chain allow it to offer a full spectrum of midstream and marketing services to the energy sector. Pembina is committed to working with its community and aboriginal neighbours, while providing value for investors in a safe, environmentally responsible manner. This balanced approach to operating ensures the trust Pembina builds among all of its stakeholders is sustainable over the long-term. Pembina's common shares trade on the Toronto and New York stock exchanges under PPL

and PBA, respectively. For more information, visit www.pembina.com.

Forward-Looking Information and Statements

This news release contains certain forward-looking information and statements that are based on Pembina's current expectations, estimates, projections and assumptions in light of its experience and its perception of historical trends. In this news release, such forward-looking information and statements can be identified by terminology such as "should", "may", "will", "continue", "if", "to be", "expects", and similar expressions.

In particular, this news release contains forward-looking statements and information relating to: future dividends which may be declared on Pembina's common shares, the dividend payment and the tax treatment thereof. These forward-looking statements are being made by Pembina based on certain assumptions that Pembina has made in respect thereof as at the date of this news release, regarding, among other things: oil and gas industry exploration and development activity levels; the success of Pembina's operations and growth projects; prevailing commodity prices, margins, volumes and exchange rates; that Pembina's future results of operations will be consistent with past performance and management expectations in relation thereto; the continued availability of capital at attractive prices to fund future capital requirements relating to existing assets and projects, including but not

limited to future capital expenditures relating to expansion, upgrades and maintenance shutdowns; the success of growth projects; future operating costs; that any third party projects relating to Pembina's growth projects will be sanctioned and completed as expected; that any required commercial agreements can be reached; that all required regulatory and environmental approvals can be obtained on the necessary terms in a timely manner; that counterparties to material agreements will continue to perform in a timely manner; that there are no unforeseen events preventing the performance of contracts; and that there are no unforeseen material construction, integrity or other costs related to current growth projects or current operations. These forward-looking statements are not guarantees of future performance and are subject to a number of known and unknown risks and uncertainties, including, but not limited to: the regulatory environment and decisions; non-performance of agreements in accordance with their terms; the impact of competitive entities and pricing; reliance on key industry partners, alliances and agreements; the strength and operations of the oil and natural gas production industry and related commodity prices; the continuation or completion of third-party projects; actions by governmental or regulatory authorities including changes in tax laws and treatment, changes in royalty rates or increased environmental regulation; adverse general economic and market conditions in Canada,

SKYSTONE INTERNATIONAL 2017 Training Schedule

North America and elsewhere; fluctuations in operating results; construction delays; labour and material shortages; and certain other risks detailed from time to time in Pembina's public disclosure documents including, among other things, those detailed under the heading "Risk Factors" in Pembina's management's discussion and analysis and annual information form for the year ended December 31, 2016, which can be found at www.sedar.com.

Accordingly, readers are cautioned that events or circumstances could cause results to differ materially from those predicted, forecasted or projected. Such forward-looking statements are expressly qualified by the above statements. Pembina does not undertake any obligation to publicly update or revise any forward looking statements or information contained herein, except as required by applicable laws.

ASC SANCTIONS JOSEPH ANTON KOSTELECKY FOR BREACHING ALBERTA SECURITIES LAWS

The Alberta Securities Commission (ASC) has sanctioned Joseph Anton Kostelecky for contravening Alberta securities laws and acting contrary to the public interest in connection with Calgary-based Poseidon Concepts Corp. Specifically, Kostelecky failed to maintain necessary books and records of Poseidon; caused, authorized and permitted or acquiesced in a breach by Poseidon of certain of its continuous disclosure obligations; and engaged or participated in a fraud.

An ASC panel ordered that Kostelecky: must resign all positions he holds as a director or officer of any issuer, and is prohibited from becoming or acting as a director or officer of any issuer, permanently; is prohibited from acting in a management or consultative capacity in connection with activities in the securities market, permanently; must pay an administrative penalty of \$650,000; and must pay \$100,000 of the costs of the investigation and hearing.

The ASC panel noted that Kostelecky exhibited a great propensity for evasion, deceit and dishonesty, he failed to acknowledge that his misconduct occurred in and affected our capital market, and he failed to fulfill the duties of a senior officer. "The filing of company financial information that is reliable, accurate and timely is important to foster a fair and efficient capital market in Alberta. This decision shows

that fraud committed by a senior executive of a public company that results in distortion of the company's financial information is a scourge that securities regulators will not tolerate," said Cynthia Campbell, ASC Director of Enforcement.

A copy of the decision is available on the ASC website at www.albertasecurities.com.

The ASC is the regulatory agency responsible for administering the province's securities laws. It is entrusted with fostering a fair and efficient capital market in Alberta and with protecting investors. As a member of the Canadian Securities Administrators, the ASC works to improve, coordinate and harmonize the regulation of Canada's capital markets.

DEPLOYING OVERSEAS AND TAKING THE LEAD, LONGI SUCCESSFULLY SELECTED INTO THE FIRST ROUND OF "CHINA'S GLOBAL TOP RUNNER IN RENEWABLE ENERGY"

On June 6, 2017, the 9th China International New Energy Expo & Energy Storage and Multi-energy Complementarity Summit Forum (CNEE) kicked off at China International Exhibition Center in Beijing. LONGi Green Energy Technology Co., Ltd. (hereinafter referred to as "LONGi") stood out from many competitors to grab the "China's Leading Global Supplier in Renewable Energy 2017" award, and successfully entered the list of "China's Global Top Runner in Renewable Energy 2017", becoming one of the first such international top-runners.

With a strong overseas market presence gained through "trade+investment", a number of world-class core technologies and other advantages, LONGi as a top runner in the global mono market was highly recognized by the expert panel and selected into the first list of "China's Global Top Runner in Renewable Energy" with flying colors.

"Rooted in China, serve the world" has always been LONGi's strategy. Riding along the "Belt and Road" initiative, LONGi ushers in more international opportunities. In the process of going abroad, LONGi has been seeking international cooperation in capacity, research and development and other aspects while striving to promote manufacturing and talent localization. It has been focusing on the solar energy planning cooperation projects in

key countries in the Asia-Pacific region to promote the development of new solar energy markets and achieve market globalization.

In the international market, LONGi has made vigorous efforts to set up branches in many countries including the United States, Japan, Ireland and Germany, and invest in countries along the "Belt and Road" including India and Malaysia. In order to improve overseas capacity quickly, the Malaysian project has started production gradually. The

500MW cell and module project is also progressing smoothly in India, effectively ensuring the company's stable supply of mono products in the overseas market.

At present, LONGi is committed to mono c-Si wafer manufacturing, mono c-Si cell and module manufacturing, and photovoltaic power station solution to maximize the value of mono products, lower the LCOE, and accelerate progress towards grid parity globally.
