JOURNEY ENERGY INC. REPORTS BOARD OF DIRECTOR CHANGES

Journey Energy Inc. (JOY - TSX) ("Journey" or the "Company") is pleased to announce that Glenn A. Hamilton has been appointed to the Board of Directors as of today.

Mr. Hamilton recently retired from Bonavista Energy Corporation where he held the positions of Senior Vice President and Chief Financial Officer. Mr. Hamilton has over 35 years of experience in accounting and finance in the oil and gas industry. He is a Chartered Professional Accountant and with his expertise and experience, it is anticipated that he will chair the Audit Committee of the Board.

Also recently joining the Board is Ryan Shay, who was elected at the annual general meeting of Journey, which was held on May 24, 2017. Mr. Shay has in excess of 20 years of experience in the oil and gas industry and was Managing Director, Head of Investment Banking at Cormark Securities Inc. until he retired therefrom in June 2016. Mr. Shay was a member of Cormark's Executive Committee, Risk Committee, Capital Markets Committee, Compensation Committee, Compliance Committee and Audit Committee.

Journey also wishes to announce that Stephen Mulherin is retiring from the Board concurrently with Mr. Hamilton's appointment. In addition, and as previously announced at the annual general meeting, Mr. Wieland Wettstein retired from the Board effective May 24, 2017. Both Mr. Mulherin and Mr. Wettstein have been members of the Board since May of 2014. Journey wishes to thank Mr. Mulherin and Mr. Wettstein for their mentorship and guidance throughout the last three years which has included the initial public offering of Journey; rationalizing Journey's asset base; stewarding the Company through the rapid oil price declines of the last two years, and reshaping the Company's shareholder base. Journey wishes both Mr. Mulherin and Mr. Wettstein all the best in their future endeavors.

TOURMALINE ANNOUNCES SIGNIFICANT MULTIPLE CHARITABLE DONATIONS BY ITS CEO

Tourmaline Oil Corp. (TSX - TOU) ("Tourmaline") is pleased to announce that its President and Chief Executive Officer, Michael Rose,

is donating a total of \$26 million to multiple ongoing charitable initiatives supporting youth education, health, and sports and include:

major donation to the new Innovation Commons in the Engineering Faculty at Queen's University, and ongoing funding of the new Masters Program in Earth and Energy Resources Leadership at Queen's University;

lead donation for the ongoing Strathcona-Tweedsmuir major school expansion project;

additional funding for the new Hotchkiss Brain Institute REEF initiative and the related Tourmaline Chair for Parkinson's Research at the University of Calgary;

sole donation for the Baseball Fieldhouse at the University of British Columbia and a major donation for the new UBC Thunderbirds Baseball stadium project;

sole donation for the post-flood rebuilding of the Stanley Park Little League baseball stadium in Calgary; and

major donation for the Community Hubs and All In for Youth United Way programs in Calgary.

The construction of the funded projects at Strathcona-Tweedsmuir

School, Queen's University, University of British Columbia and the University of Calgary is well underway and expected to be largely completed in 2017. These charitable projects supported by Mr. Rose and spouse, Susan Riddell Rose, will be personally funded by Mr. Rose from the sale or donation of approximately 7.5% of his current total shareholdings of over 13 million shares. Once these trades are settled, Mr. Rose will own approximately 12.1 million common shares, representing approximately 4.5% of Tourmaline's total outstanding shares on a non-diluted basis. Tourmaline was advised by Mr. Rose that his decision to sell a portion of his common shares in Tourmaline was made for the purposes of funding these various charitable initiatives and that he is not planning any further Tourmaline stock sales at this time.

About Tourmaline Oil Corp.

Tourmaline is a Canadian senior crude oil and natural gas exploration and production company focused on long-term growth through an aggressive exploration, development, production and acquisition program in the Western Canadian Sedimentary Basin.

SUNGROW AND YUASA ENTER INTO STRATEGIC PARTNERSHIP IN JAPAN

Sungrow, the global leading PV inverter system solution supplier, announced that it has partnered with YUASA Trading Co., Ltd, a renowned Japanese trading company, to distribute its PV inverters in Japan, aiming to provide better sales services for Japanese customers.

This partnership has turned YUASA, a 350-year trading company now with up to JPY 100 billion of its JPY 500 billion annual revenue coming from new energy business, into one of the most important distributors for Sungrow in Japan. YUASA will continue to promote Sungrow's PV inverters through various ways, including showcasing them during the upcoming YUASA trade fairs this July and October.

As a result of their cooperation, a batch of SG49K5J string inverter customized for the Japanese market has been delivered to YUASA's national sales network this May.

"Sungrow's PV inverters are known for its high quality and stable performance. We are confident that our cooperation will bring the latest PV inverter technologies to Japan and further benefit the Japanese solar market," said a senior manager from YUASA.

"YUASA is a highly reputable trade firm with a long history. Backed by the complete trading system of YUASA, we can upgrade our sales network in Japan and our cutting-edge PV inverter technologies will better service Japanese customers," said Professor Renxian Cao, president of Sungrow.

About Sungrow

Sungrow is a global leading PV inverter system solution supplier with over 31GW installed worldwide as of December 2016. Founded in 1997 by University Professor Renxian Cao, Sungrow is a global leader in research and development in solar inverters, with numerous patents and a broad product portfolio offering PV inverter systems as well as energy storage systems for utility-scale, commercial, and residential applications. With a 20-year track record of growth and success, Sungrow's products are available in over 50 countries, maintaining a market share of around 25% in Germany and over 15% globally.

Learn more about Sungrow by visiting: <http://www.sungrowpower.com>

About YUASA

Founded during the Edo Period in 1666, the Yuasa Trading Group is a group of specialized trading companies contributing to "lifestyle and industry" support, engaging in trade, solution provision, design and construction, development and manufacturing, and processing in relation to machine tools, industrial equipment and tools, air and fluidic control systems, housing and building supplies, construction machinery, energy, home appliances, consumer goods and lumber.

MOODY'S CONFIRMS ECOPETROL S.A.'S INVESTMENT-GRADE RATING

Ecopetrol S.A (BVC: ECOPETROL; NYSE: EC) ("Ecopetrol" or the "Company") reports that the risk-rating agency Moody's Investors Service has maintained its international credit investment-grade rating of Baa3.

Moody's noted that since 2016, a greater operating and capital efficiencies combined with high oil prices have helped Ecopetrol improve its credit metrics and cash flow, which have enhanced its capacity for debt and investments in new reserves. At the same time, the rating agency stressed the favorable results of the Transportation sector in recent years.

In its report, the agency maintained the Company's negative prospects given current reserve life, while awaiting the results of the investment plan for organic and non-organic growth; and progress in the Reficar investigations.

This release contains statements that may be considered forward looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934. All forward-looking statements, whether made in this release or in future filings or press releases or orally, address matters that involve risks and uncertainties, including in respect of the Company's prospects for growth and its ongoing access to capital to fund the Company's business plan, among others. Consequently, changes in the following factors, among others, could cause actual results to differ materially from those included in the forward-looking statements: market prices of oil & gas, our exploration and production activities, market conditions, applicable regulations, the exchange

rate, the Company's competitiveness and the performance of Colombia's economy and industry, to mention a few. We do not intend, and do not assume any obligation to update these forward-looking statements.

NEW UTILITY BILL ASSISTANCE FUND AVAILABLE BY DIALING 211

Strongly committed to Alberta, Direct Energy is proud to partner with the United Way of Calgary and Area and the Alberta Capital Region to help Albertans who are experiencing financial crisis pay their utility bills.

The United Way's new Direct Energy Emergency Fund provides a helping hand for hundreds of families, and reduces the risk of them falling into debt due to utility bills in arrears or disconnection notices.

Effective tomorrow, any Albertan living in the Calgary or Edmonton area may contact 211 to speak with a case worker to determine eligibility.

"With almost one million customers, we understand the financial challenges many Albertans are facing. We want to help those who need it most," said Tanis Kozak, Vice President and General Manager, Canada, Direct Energy. "By partnering with the United Way, the new Direct Energy Emergency Fund will deliver much-needed financial relief for families struggling with basic needs, including natural gas and electricity bills."

"When unemployment rates rise in the Alberta Capital Region, more families and individuals struggle to pay for essentials such as utilities," said Anne Smith, President and CEO of United Way of the Alberta Capital Region. "We are seeing an increase in calls to 211 seeking this type of assistance, and Direct Energy's support through this fund will make an important difference for people in need."

Direct Energy's three-year funding commitment of \$500,000 will be available to Albertans served by the United Way of Calgary and Area and the Alberta Capital Region.

Disconnected or pending disconnected utilities are not a specific requirement.

All requests for individual assessment and assistance should be directed to 211 or www.ab.211.ca.

For further details about the Fund, please visit www.directenergy.com/alberta/emergency_fund.

EDC TO PROVIDE PROJECT FINANCING FOR DUBAI SOLAR PARK FOR KEY CONTRACT WITH CANADIAN SOLAR

Export Development Canada (EDC) today announced USD 72 million in financing within the larger USD 655 million senior project finance banking facilities for Phase 3 of the Mohammed bin Rashid Al Maktoum Solar Park (Solar Park) in Dubai, which will become the most powerful solar power plant in the world upon completion.

The project consists of the development, construction, and operation of an 800MW solar photovoltaic (PV) power project located within the Solar Park. EDC's financing is predicated on the sale of solar panels from Canadian Solar, a Guelph-based clean technology company.

"We are proud to be partnering with Masdar/DEWA/EDF on this outstanding project," says Dr. Shawn Qu, Chairman and Chief Executive Officer, Canadian Solar. "On the financing side, we are very pleased to have EDC's commitment and continuous support for our global growth. As Dubai diversifies its energy portfolio, our partnership will serve as an excellent example for future utility-scale solar projects in the region, and we are eager to contribute further to the energy market growth in the Middle East."

The 16 square-kilometre 800 MW PV plant will generate around 2.5 million megawatt-hours of electricity per annum on completion. Unlike conventional solar power arrays, the park will use tilting panels that track the sun, thereby maximising output.

"Supporting clean technologies is a strategic priority for EDC," said Carl Burlock, Senior Vice President, Financing and International Growth Capital, EDC. "Canadian Solar's contribution to an international project of this size is a testament to Canada's leading expertise in the clean energy space."

The Solar Park will be the largest single-site solar park in the world. By 2030, it is expected to displace an estimated 6.5 million tonnes of carbon dioxide each year.

This is an example of an eligible project for EDC's Green Bond program. In June 2017, EDC issued its third USD 500M Green Bond, with previous bonds of 300M in January 2014 and 300M in December 2015, each receiving strong support from the green bond investor community.

"Green Bonds and transactions such as this one are examples of EDC's contribution to international climate change objectives, and our alignment with broader industry trends towards a climate-resilient future," added Burlock.

About Canadian Solar

Founded in 2001 in Canada, Canadian Solar is one of the world's largest and foremost solar power companies. As a leading manufacturer of solar photovoltaic modules and provider of solar energy solutions, Canadian Solar also has a geographically diversified pipeline of utility-scale power projects in various stages of development. In the past 16 years, Canadian Solar has successfully delivered over 21 GW of premium quality modules to over 100 countries around the world. For additional information about the Company, follow Canadian Solar on LinkedIn or visit www.canadiansolar.com.

About EDC EDC helps Canadian companies go, grow, and succeed in their international business. As a financial Crown corporation, EDC provides financing, insurance, bonding, trade knowledge, and matchmaking connections to help Canadian companies sell and invest abroad. EDC can also provide financial solutions to foreign buyers to facilitate and grow purchases from Canadian companies.

For more information about how we can help your company, call us at 1-888-434-8508 or visit www.edc.ca.

KEYERA ANNOUNCES \$400 MILLION PRIVATE PLACEMENT DEBT FINANCING

Keyera Corp. (TSX:KEY) ("Keyera") announced today that it is entering into a private placement of 10-year senior unsecured notes (the "Notes") totaling CAD\$400 million with a group of institutional investors in Canada and the United States. The Notes will bear interest at 3.68% and mature on September 20, 2027.

RBC Capital Markets, LLC acted as lead placement agent on the offering and Citigroup Global Markets Inc. acted as co-placement agent.

The transaction provides Keyera with long-term financing at attractive rates. Proceeds from the Notes will be used to repay short-term debt incurred to execute Keyera's capital program and for general corporate purposes. Subject to satisfying closing conditions, the transaction is expected to close on September 20, 2017 with the proceeds drawn on the same date. Interest will be paid semi-annually.

About Keyera

Keyera Corp. (TSX:KEY) operates one of the largest midstream energy companies in Canada, providing essential services to oil and gas producers in the Western Canada Sedimentary Basin. Its predominantly fee-for-service based business consists of natural gas gathering and processing, natural gas liquids processing, transportation, storage, marketing, iso-octane production and sales, and an industry-leading condensate system in the Edmonton/Fort Saskatchewan area of Alberta. Keyera strives to provide high quality, value-added services to its customers across North America and is committed to conducting its business ethically, safely and in an environmentally and financially responsible manner.

Forward-Looking Statements

This news release contains forward-looking statements based on Management's current expectations and assumptions relating to Keyera's business, its financing strategy, the placement of the long-term senior unsecured notes, the use of proceeds from the placement of those notes and the timing for closing of the notes placement. Although Keyera believes that the expectations reflected in these forward-looking statements are reasonable, undue reliance should not be placed on them. As the forward-looking statements depend upon future events, actual outcomes may differ materially depending on factors such as: satisfaction of the closing conditions for the notes placement; the activities and actions of the counterparties in the placement; overall economic conditions; activity within the capital markets; the legislative, regulatory and tax environment; and other known or unknown factors. There can be no assurance that the results or developments anticipated by Keyera will be realized or that they will have the expected outcomes.

For additional information on these and other factors, see Keyera's

public filings on www.sedar.com. The information provided in this release is given as of the date hereof. Readers are cautioned that they should not unduly rely on forward-looking information.

ROCKETFRAC ANNOUNCES FORMER NASA SENIOR EXECUTIVE HON. RONALD R. SPOEHEL APPOINTED CHAIRMAN OF THE BOARD

RocketFrac Services Ltd. ("RocketFrac"), a privately-held company developing an environmentally safe, proprietary fracing tool using solid rocket fuel, is pleased to announce that the Honourable Ronald R. SpoeHEL, former Presidentially-Appointed and U.S. Senate confirmed Chief Financial Officer (CFO) of the National Aeronautics and Space Administration (NASA), has been elected to serve as the Chairman of the Board of Directors.

Mr. SpoeHEL has over 35 years experience in the energy and technology sectors, including serving as an executive officer in various general management positions and on the Boards of public and private companies in the U.S., Canada, Latin America, and Europe. Following NASA, Mr. SpoeHEL founded and is Managing Partner of Windrock Capital and presently serves on the Boards of publicly-traded Profire Energy, STG Group, and Millennial Esports. Among various companies with worldwide operations, he has served in general management and/or on the Board of ICF Kaiser Engineers, Acer Group, Harris Corporation, Optinel Systems, ManTech, and ICx Technologies. Previously he was in investment banking at Bank of America and Shearson Lehman, and in program management at Hughes Aircraft. He is an honours graduate of the University of Pennsylvania, where he received his BS in Economics and MBA in Finance from the Wharton School and MSE from the Moore School of Electrical Engineering.

"Our team at RocketFrac is extremely excited to have Ron join the Board and especially step into the lead role of Chair", said Annelise Freeman, CEO of RocketFrac. "Since we first engaged Ron in initial discussions he has shown an extremely thoughtful and diligent interest in our team, in the development of our technology, and in the opportunities our technology will bring as an alternative to hydraulic fracing".

"I am pleased to join RocketFrac

and its talented team who have already made tremendous progress in their proprietary development of an environmentally safe fracing technology. I am quite confident in Annelise, my fellow Board Members Jack Reeve and Skip Stone, and the RocketFrac team's ability to build and commercialize this transformative technology for the oil and gas industry," said Mr. Spoehel, RocketFrac Chairman.

About RocketFrac Services Ltd. ("RocketFrac"):

RocketFrac Services Ltd., a private Canadian company headquartered in Calgary, Alberta, is developing a proprietary new fracing tool, PSI-KICKTM, propelled by a customized blend of solid rocket fuel which will improve oil and gas well productivity. Environmentally safe, completely waterless, and optimizing well production efficiencies, PSI-KICKTM addresses some of the most pressing problems facing the oil and gas industry today while delivering sustainable and economic value for oil and gas producers and their stakeholders.

ENCHANTED ROCK / TEXAS MICROGRID POWERS HOLLY HALL RETIREMENT COMMUNITY

Holly Hall Retirement Community (Holly Hall), opened in 1949 as Houston's first retirement community, has entered a long-term agreement with Houston-based Texas Microgrid LLC (TMG) providing Enchanted Rock's ("ERock") On Demand Electric Reliability service for Holly Hall's Houston location. Located just miles from the Gulf Coast, the Houston area is susceptible to significant weather events such as hurricanes, tropical storms, high winds and flooding and Holly Hall is taking measures to ensure that residents remain comfortable and safe when utility service goes down.

Prolonged power outages caused by hurricanes and floods could require an evacuation of the Holly Hall community, causing significant stress to the community both mentally and financially. Holly Hall experienced a 4-hour power outage earlier this year that spurred their Board of Directors to search for a backup power solution. They needed a flexible backup system that could meet future growth and regulatory changes while providing reliable backup power. Through ERock's proprietary natural gas microgrid design, TMG will provide full electrical reliability for Holly Hall's main campus, ensuring critical service is available to residents during

all weather-related emergencies.

"We are very excited to partner with Enchanted Rock to provide back-up generation to our entire campus," said Amy Ward, Senior Director of Operations for Holly Hall. "Their reliability will ensure that we can provide seamless service to our residents during any outages, most especially due to inclement weather, and will also allow us to comply with the new CMS Phase I regulations. Hands down, Enchanted Rock is the perfect resiliency microgrid solution for Holly Hall."

ERock's On Demand Electric Reliability service allows customers to pay a small fraction of the installation cost of a standard reliability system. TMG owns and ERock operates the system for the life of the agreement, allowing the customer to focus their time and capital on their core business.

James Vasquez, Senior Sales Executive at Enchanted Rock, said "We are very happy to partner with Holly Hall in their efforts to better serve their residents by providing reliability that will power their campus in the event of an outage. Our microgrid provides Holly Hall with a backup solution that is clean, quiet, quick responding, affordable, and flexible to meet additional future demand."

About Enchanted Rock

Founded in 2006, Enchanted Rock, Ltd. builds and operates cost effective reliability microgrids that help companies manage physical and financial risk associated with electricity. In 2010 we became the first in Texas to provide utility grade backup power as a service. The company is responsible for the design, project management, installation, and commissioning of 237 MW of distributed generation, including 160 MW of Distributed Power Generation projects and 77 MW of customer reliability systems. The company currently has 118 MWs of customer reliability microgrids under construction. For more information on ERock's unique reliability service offering, please contact James Vasquez at jvasquez@erockhold.com.

About Holly Hall

Holly Hall Retirement Community is a unique, non-denominational Christian retirement community for persons 65 years of age or older founded in 1949. As Houston's first retirement community, Holly Hall has stayed true to its mission of "adding years to life and life to years" and is committed to sustaining independence and providing a rich quality of life for senior Houstonians. Since opening in 1952, Holly Hall

has been home to over 1,200 residents. Holly Hall is a 501 (c) (3) organization and is dependent on support from churches, foundations and individuals to continue its commitment to keep the founders' vision alive. For more information visit www.hollyhall.org.

SOURCE Enchanted Rock, Ltd.

ECOPETROL WINS TWO BLOCKS FOR HYDROCARBON EXPLORATION AND PRODUCTION IN MEXICAN SHALLOW WATERS

Ecopetrol S.A (BVC: ECOPETROL; NYSE: EC) ("Ecopetrol" or the "Company") reports that in a public ceremony held today in Mexico City, Mexico's National Hydrocarbons Commission finalized the bidding process CNH-R02-L01/2016, awarding shared production contracts for hydrocarbon exploration and extraction in 15 Mexican shallow-water areas.

Ecopetrol S.A. submitted the best offers and was declared the winning bidder for two blocks in the southeast basins, together with Petronas and Pemex.

The first was Area 6 (559 square meters), along with its partner PC Carigali México (a Petronas subsidiary); the firms offered the government 65.19% of operating profits and an additional investment factor of 1.0, equivalent to one well.

The second block Ecopetrol won was Area 8 (586 square kilometers). In this block its strategic partner was Pemex de México and the operating profit offered to the Government was 20.10%, with an additional investment factor of 0.

The participation of Ecopetrol in both blocks is 50%.

This achievement is part of the strategy to strengthen and diversify exploration and production activities in Colombia and abroad, thus increasing hydrocarbon reserves. The Ecopetrol Group is active in the United States, Brazil, Peru and, as of today, Mexico.

Ecopetrol is arriving in this market through the Mexican Government's strategy of attracting foreign investment, with a commitment to implementing high standards of operations, industrial safety and corporate responsibility.

This release contains statements that may be considered forward looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934. All forward-

looking statements, whether made in this release or in future filings or press releases or orally, address matters that involve risks and uncertainties, including in respect of the Company's prospects for growth and its ongoing access to capital to fund the Company's business plan, among others. Consequently, changes in the following factors, among others, could cause actual results to differ materially from those included in the forward-looking statements: market prices of oil & gas, our exploration and production activities, market conditions, applicable regulations, the exchange rate, the Company's competitiveness and the performance of Colombia's economy and industry, to mention a few. We do not intend, and do not assume any obligation to update these forward-looking statements.

FORTISBC NATURAL GAS RATES TO REMAIN LOW THIS SUMMER

As of July 1, 2017, FortisBC customers will see no change to the cost of gas on their billing statement. FortisBC has received approval to maintain the cost of natural gas rates from the British Columbia Utilities Commission (BCUC). The cost of propane rates will also be maintained for those customers in Revelstoke.

Every three months, FortisBC reviews the cost of gas rates with the BCUC to make sure rates passed on to customers cover the cost of purchasing the natural gas on their behalf. FortisBC does not mark up the cost of gas, customers pay what we pay.

"Maintaining the cost of gas rate this quarter gives our customers predictability in what they can expect when they receive their bill," said Diane Roy, vice-president of regulatory affairs at FortisBC. "Natural gas remains the affordable and efficient energy choice for home and business heating. In fact, it's about one third the cost of electricity for space and water heating."

Below are the continued current cost of gas rates for each region as of July 1, 2017:

Lower Mainland, Vancouver Island, Whistler, Fraser Valley, Interior, North and the Kootenays

No change to the current rate of \$2.050 per gigajoule (GJ).

Fort Nelson

No change to the current rate of \$2.086 per GJ.

Revelstoke

No change to the current residential cost of propane rate of \$11.088 per GJ. Cost of propane rates for commercial

customers are also maintained. Save with natural gas While natural gas continues to be the number one heating choice

in Canada, it is still important for customers to use energy wisely in order to keep costs down. FortisBC is committed to helping

customers conserve energy and get the most out of their energy dollar by providing both financial incentives and advice on energy efficient technologies and practices. This

summer, customers can choose the versatility of natural gas for outdoor living spaces. Natural gas appliances not only offer convenience and reliability but also cost savings.
