READOUT - FEDERAL, PROVINCIAL MINISTERS DISCUSS U.S. ANTI-DUMPING ANNOUNCEMENT

Canada's Minister of Natural Resources, the Honourable Jim Carr, and his provincial counterparts today reiterated their commitment to stand firmly behind the Canadian forest industry and vigorously defend its interests.

The members of the Federal-Provincial Task Force on Softwood Lumber held a teleconference in response to the announcement by the U.S. Department of Commerce this week imposing preliminary anti-dumping duties on imports of certain Canadian softwood lumber products into the U.S. and the announcement of consultations on excluding three provinces from duties.

Minister Carr and his provincial counterparts discussed the importance of Canada's softwood lumber industry as an innovative, environmentally responsible and globally competitive industry that sustains hundreds of thousands of good, middle-class jobs across our country, including in rural and Indigenous communities.

Ministers reaffirmed their commitment to forest workers and communities that rely on softwood lumber and agreed to continue to discuss how Canada will respond to these unfair and punitive duties. Today's discussion builds on a recent federal investment of \$867 million to strengthen the softwood lumber industry, support its workers and diversify the uses and markets for Canadian wood and wood products.

Ministers agreed that the Government of Canada should continue to forcefully press its American counterparts to rescind these unfair and unwarranted trade actions while remaining confident that a negotiated settlement is not only possible but in the best interests of both countries.

ALIMENTATION COUCHE-TARD INC. ANNOUNCES COMPETITION CLEARANCE IN CANADA OF THE ACQUISITION OF CST BRANDS, INC. AND THE TRANSACTION WITH PARKLAND

Alimentation Couche-Tard Inc. ("Couche-Tard") (TSX: ATD.A.ATD.B) announces that it has obtained clearance from the Competition Bureau in Canada for the acquisition

of CST Brands, Inc. ("CST") and the transaction with Parkland Fuel Corporation ("Parkland") (TSX: PKI). The closings of both transactions are expected to occur on June 28, 2017.

Agreement to sell assets in Canada Following the review by the Competition Bureau and a consent agreement reached with the Commissioner of Competition, and in compliance with an agreement signed with Parkland, Parkland will be purchasing from Couche-Tard the majority of CST's Canadian assets located in Québec, the Atlantic provinces and Ontario:

- a 100% of CST's Commercial Cardlock business;
- b 100% of CST's Commercial and Home Energy business;
- c Substantially all of CST's Dealer and Commissioned Agents business;
- d 159 of CST's company-operated stores; and
- e CST's Montréal corporate head office.

As a result of the transaction with Parkland, Couche-Tard will receive approximately CA\$ 985 million and will be adding 157 company operated sites across its network in Québec, Atlantic provinces and Ontario.

Following these transactions, Couche-Tard would operate over 1,300 new sites in the United States (Arkansas, Arizona, Colorado, Florida, Georgia, Louisiana, New Mexico, New York, Oklahoma and Texas) and Canada (Québec, Atlantic provinces and Ontario) and would bring its total network to nearly 14,000 sites worldwide.

About Alimentation Couche-Tard Inc.

Couche-Tard is the leader in the Canadian convenience store industry. In the United States, it is the largest independent convenience store operator in terms of the number of company-operated stores. In Europe, Couche-Tard is a leader in convenience store and road transportation fuel retail in the Scandinavian countries (Norway, Sweden and Denmark), in the Baltic States (Estonia, Latvia and Lithuania) and in Ireland and with also an important presence in Poland.

As of January 29, 2017, Couche-

Tard's network comprised of 8,081 convenience stores throughout North America, including 6,710 stores with road transportation fuel dispensing. Its North American network consists of 15 business units, including 11 in the United States covering 41 states and 4 in Canada covering all 10 provinces. Approximately 80,000 people are employed throughout its network and at its service offices in North America.

In Europe, Couche-Tard operates a broad retail network across Scandinavia, Ireland, Poland, the Baltics states and Russia through ten business units. As of January 29, 2017, Couche-Tard's network comprised of 2,766 stores, the majority of which offer road transportation fuel and convenience products while the others are unmanned automated fuel sites which only offer road transportation fuel. Couche-Tard also offers other products, including stationary energy, marine fuel, aviation fuel, lubricants and chemicals. Including employees at its branded franchise stores, approximately 25,000 people work in its retail network, terminals and service offices across Europe.

In addition, under licensing agreements, close to 1,700 stores are operated under the Circle K banner in 13 other countries and territories worldwide (China, Costa Rica, Egypt, Guam, Honduras, Hong Kong, Indonesia, Macau, Malaysia, Mexico, the Philippines, the United Arab Emirates and Vietnam), which brings the total

network to more than 12,500 stores. For more information on Alimentation Couche-Tard Inc., please visit: <http://corpo.couche-tard.com>.

ITC LAKE ERIE CONNECTOR PROJECT RECEIVES APPROVALS FROM CANADA AND THE STATE OF PENNSYLVANIA

ITC Lake Erie Connector LLC, a wholly-owned subsidiary of ITC Holdings Corp., the largest independent electricity transmission company in the United States, today announced that Canada's Governor in Council has approved the issuance of a Certificate of Public Convenience and Necessity for the ITC Lake Erie Connector transmission line.

Canada's National Energy Board (NEB) issued the certificate on June 26. The NEB provided its initial recommendation of the certificate to Canada's Governor in Council on January 19, 2017. The issuance of the Certificate of Public Convenience and Necessity completes the project's major permit application process in Canada.

In addition, the Pennsylvania Department of Environmental Protection on May 25, 2017 issued two required permits for the project: a State Water Obstruction and Encroachment Permit, and a National Pollutant Discharge Elimination System Permit for Stormwater Associated with Construction Activities. This completes the project's major permit

process in Pennsylvania, which ITC initiated on January 29, 2016.

The ITC Lake Erie Connector is a proposed 1,000 MW, bi-directional, high-voltage direct current (HVDC) underwater transmission line that would provide the first direct link between the markets of the Ontario Independent Electricity System Operator (IESO) and PJM Interconnection, LLC (PJM). The project would enable transmission customers to more efficiently access energy, capacity and renewable energy credit opportunities in both markets.

"These are key milestones in the development of the Lake Erie Connector Project," said Terry Harvill, Ph.D., president, ITC Grid Development. "We appreciate the thorough attention given to our application by the Governor in Council, the National Energy Board and the state of Pennsylvania. This electric transmission interconnection under Lake Erie would provide Ontario with access to a new, large export market for excess electricity generation, and this bi-directional line also would allow less expensive, clean energy to flow into the province from the U.S.," said Dr. Harvill.

The NEB Certificate of Public Convenience and Necessity, initial NEB Report and the Pennsylvania Department of Environmental Protection permits can be viewed on the project website at www.itclakeerieconnector.com.

Project Status

In addition to the approval from Canada's Governor in Council and the National Energy Board, ITC has received a Presidential Permit from the U.S. Department of Energy, which is necessary for international border-crossing projects. Major remaining project milestones include receiving approval from the U.S. Army Corps of Engineers, completing project cost refinements and securing favorable transmission service agreements with prospective counterparties, after which ITC would proceed with construction.

ITC has completed the necessary system impact studies in IESO and PJM, signed service agreements with the manufacturers of the converter stations and the submarine cable, and secured nearly all land necessary for the terrestrial cable route, converter stations and construction laydown areas. The company has held or participated in numerous public consultations in Ontario and Pennsylvania – the respective terrestrial points of the line – to discuss the project and gather community input.

Project Specifications

The ITC Lake Erie Connector is a proposed +/- 320 kV HVDC bi-directional transmission line, approximately 73 miles in length, that would connect converter stations located in Erie, Pennsylvania and Nanticoke, Ontario. A 345 kV alternating current (AC) line would connect the Erie converter station to Penelec's existing Erie West substation, while a 500kV AC line would tie the Nanticoke converter station to Hydro One's Nanticoke substation. The majority of the transmission line would be buried beneath Lake Erie or underground using existing roadway rights-of-way.

About ITC Holdings Corp.

ITC, a Fortis company, is the largest independent electricity transmission company in the United States. Based in Novi, Michigan, ITC invests in the electric transmission grid to improve reliability, expand access to markets, allow new generating resources to interconnect to its transmission systems and lower the overall cost of delivered energy. Through its regulated operating subsidiaries ITC Transmission, Michigan Electric Transmission Company, ITC Midwest and ITC Great Plains, ITC owns and operates high-voltage transmission infrastructure in Michigan, Iowa, Minnesota, Illinois, Missouri, Kansas and Oklahoma, and in development in Wisconsin. These systems serve a combined peak load exceeding 26,000 megawatts along approximately 15,800 circuit miles of transmission line, supported by 660 employees and nearly 1,000 contractors across our expanding footprint. ITC's grid development focus includes growth through regulated infrastructure investment as well as domestic and international expansion through merchant and other commercial development opportunities. Additional information can be accessed at www.itc-holdings.com.

Cautionary Language Concerning Forward Looking Statements

This document contains certain statements that describe our management's beliefs concerning future business conditions and prospects, growth opportunities and the outlook for our business and the electricity transmission industry based upon information currently available. Such statements are "forward-looking" statements and wherever possible, we have identified these forward-looking statements by words such as "anticipates", "believes", "intends", "estimates", "expects", "projects" and similar phrases. These forward-looking statements are based upon

SKYSTONE INTERNATIONAL 2017 Training Schedule

As a leading provider of Integrity & Safety services we offer the following courses:

Pipeline Integrity Management

Pipeline and Facility Installation Inspector's Course

Regulatory & CSA Z662 Pipeline Systems Code Requirements

Regulatory & ASME B31.3 Process Piping Code Requirements

We continue to offer our technical training courses at reduced rates to help ensure everyone keeps up to date with their training and remains employable.

assumptions our management believes are reasonable. Such forward-looking statements are subject to risks and uncertainties which could cause our actual results, performance and achievements to differ materially from those expressed in, or implied by, these statements, including, among other things, the risks and uncertainties disclosed in our annual report on Form 10-K and our quarterly reports on Form 10-Q filed with the Securities and Exchange Commission from time to time.

Because our forward-looking statements are based on estimates and assumptions that are subject to significant business, economic and competitive uncertainties, many of which are beyond our control or are subject to change, actual results could be materially different and any or all of our forward-looking statements may turn out to be wrong. They speak only as of the date made and can be affected by assumptions we might make or by known or unknown risks and uncertainties. Many factors mentioned in our discussion in this document and in our annual and quarterly reports will be important in determining future results. Consequently, we cannot assure you that our expectations or forecasts expressed in such forward-looking statements will be achieved. Actual future results may vary materially. Except as required by law, we undertake no obligation to publicly update any of our forward-looking or other statements, whether as a result of new information, future events, or otherwise.

**CO2 SOLUTIONS
ANNOUNCES
PARTNERSHIP WITH
CERT IN THE NRG
COSIA CARBON XPRIZE
COMPETITION**

CO2 Solutions Inc. (or the "Corporation") (TSXV: CST) is pleased to announce that Team CERT, a multidisciplinary team of over 15 researchers based at the University of Toronto and led by Professor Ted Sargent, will partner with CO2 Solutions in the XPRIZE competition. This partnership constitutes a second entry for CO2 Solutions in the XPRIZE competition.

On October 17, 2016, the organizers of the XPRIZE competition announced that CO2 Solutions and CERT had both been selected to participate in the second round of the prestigious NRG COSIA Carbon XPRIZE competition. Alongside its entry in the competition, through which it will demonstrate a process of capture and reuse of CO2 into acetic acid, the Corporation has also been authorized to partner with other

contenders offering a CO2 reuse process only. These newly formed combined entries will propose the CO2 Solutions capture process with the reuse process of the partner company. The announced CO2 Solutions-CERT entry is an example of such a combination. CO2 Solutions and CERT would share equally any prize money that maybe awarded to this joint entry.

Team CERT has developed a promising technology based on a record performing catalyst to transform CO2 into carbon monoxide (CO). This industrial gas is central to the purification of metals from ores. CO also plays a major role for the bulk production in the chemical industry.

About the NRG COSIA Carbon XPRIZE Competition

Few challenges are greater and more critical than ensuring access to clean, affordable and abundant energy. As the global energy supply remains primarily derived from fossil fuels – the leading contributor to climate change – the \$20M NRG COSIA Carbon XPRIZE will challenge the world to reimagine what we can do with CO2 emissions by incentivizing and accelerating the development of technologies that convert CO2 from a liability into valuable products. For more information, visit: www.carbon.xprize.org.

About Team CERT

Team CERT is a multidisciplinary team of researchers affiliated with the University of Toronto in Canada. The Team has a diverse background spanning chemistry, materials science, physics, photonics and electrical engineering. Their work on addressing the need for carbon-neutral fuel systems has focused on efficient reduction of atmospheric CO2 into usable carbon products for renewable fuels and chemical feedstocks. Team CERT has developed record performance catalysts for the reduction of CO2 into CO, and the evolution of O2 from H2O—two key reactions needed to realize this goal. Further information can be found at <http://carbon.xprize.org/teams/cert>.

About CO2 Solutions Inc.

CO2 Solutions is an innovator in the field of enzyme-enabled carbon capture and has been actively working to develop and commercialize the technology for stationary sources of carbon pollution. CO2 Solutions' technology lowers the cost barrier to Carbon Capture, Sequestration and Utilization (CCSU), positioning it as a viable CO2 mitigation tool, as well as enabling industry to derive profitable new products from these emissions. CO2 Solutions has built an

extensive patent portfolio covering the use of carbonic anhydrase, or analogues thereof, for the efficient post-combustion capture of carbon dioxide with low-energy aqueous solvents. Further information can be found at www.co2solutions.com.

CO2 Solutions Forward-looking Statements

Certain statements in this news release may be forward-looking. These statements relate to future events or CO2 Solutions' future economic performance and reflect the current assumptions and expectations of management.

Certain unknown factors may affect the events, economic performance and results of operation described herein. CO2 Solutions undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable law.
