TESHMONT CONSULTANTS LP: EVOLVING THE ELECTRICAL LANDSCAPE OF DOWNTOWN WINNIPEG

Teshmont, a leader in electric power transmission engineering services, played a key role as a supplier to General Electric Canada in the recent completion of a contract for the engineering, procurement and construction of a 66/12 kilovolt (kV) substation designed to meet downtown Winnipeg's increasing energy needs and to improve the reliability of the downtown network.

Teshmont was responsible for protection and control design engineering and testing services which utilized advanced network integrated systems. Teshmont was selected as a supplier because of the company's strong knowledge and experience in Protection and Control (P&C) and Substation Automation Systems (SAS). Construction of the new substation, located on the corner of Hargrave Street and Adelaide Street, began in May 2015.

The development of the Adelaide

Substation leads a charge by Manitoba Hydro to upgrade Winnipeg's aging substations with newer, more reliable power delivery systems over the next decade. Increasing demand for power in downtown Winnipeg caused by new infrastructure and investment, combined with aging technology, precipitated the need for Manitoba Hydro to invest in the construction of the Adelaide Substation.

"Considering the age of many of Winnipeg's substations, and their operating limits, Manitoba Hydro's investment in the replacement and refurbishment of the existing substations is of paramount importance," says Ralph Kurth, President of Teshmont. "By applying tried-and-true engineering practices with innovative technology, we're ensuring that the Adelaide Substation will provide a great deal of benefit to downtown Winnipeg for the foreseeable future."

The IEC 61850 compliant substation features three 30 MVA transformers, with space for three additional transformers in the future to accommodate growing energy needs, 12 kV metal clad switchgear and 66 kV Gas Insulated Switchgear (GIS). This

primarily indoor facility is surrounded by a perimeter wall designed to blend the facility into its surroundings.

Through the careful implementation of new technology and equipment, the substation will provide increased power system reliability and capacity – and the ability to serve power effortlessly throughout the downtown area, while being environmentally conscious and with minimal footprint. In addition, advanced technology has been implemented to allow for timely performance monitoring and analysis.

"We're very pleased to have been selected to work with General Electric Canada as one of the key suppliers on this important and challenging project for Manitoba Hydro," says Ralph Kurth, President.

About

Teshmont:

Teshmont specializes in providing electrical engineering services for power transmission systems. Our engineers and technologists provide a wide range of services, from specialized studies to complete project design and implementation support. We are recognized worldwide for our high voltage direct current (HVDC) expertise and have designed and managed the installation of transmission systems from

northern Canada to the Middle East.

Company and our shareholders." Ms. Walker holds an MBA from Xavier University. Prior to starting Elm Street Resources, she served as Secretary and Controller of Agip Coal, USA, a subsidiary of the Italian National Energy Agency ENI. She is currently a member of the National Coal Council and Board member of the Kentucky Coal Association; a member of the Kentucky Judicial Campaign Conduct Committee; and a member of the Morehead State University Board of Regents. Previously, Ms. Walker served as the Chair of the Energy and Environment transition team for Kentucky Governor Matt Bevin; was a founder and Board member of First Security Bank, Lexington, Kentucky and of Great Nations Bank, Norman, Oklahoma.

About Ur-Energy

Ur-Energy is a uranium mining company operating the Lost Creek in-situ recovery uranium facility in south-central Wyoming. We have produced, packaged and shipped more than two million pounds from Lost Creek since the commencement of operations. Applications are under review by various agencies to incorporate our LC East project area into the Lost Creek permits, and we have begun to submit applications for permits and licenses to construct and operate at our Shirley Basin Project. Ur-Energy is engaged in uranium mining, recovery and processing activities, including the acquisition, exploration, development and operation of uranium mineral properties in the United States. Shares of Ur-Energy trade on NYSE American under the symbol "URG" and on the Toronto Stock Exchange under the symbol "URE." Ur-Energy's corporate office is in Littleton, Colorado; its registered office is in Ottawa, Ontario. Ur-Energy's website is www.ur-energy.com.

Cautionary Note Regarding Forward-Looking Information

This release may contain "forward-looking statements" within the meaning of applicable securities laws regarding events or conditions that may occur in the future (e.g., the skills and experience Ms. Walker may bring to the Board, as well as the benefits expected from adding her to the Board) and are based on current expectations that, while considered reasonable by management at this time, inherently involve a number

of significant business, economic and competitive risks, uncertainties and contingencies. Factors that could cause actual results to differ materially from any forward-looking statements include, but are not limited to, capital and other costs varying significantly from estimates; failure to establish estimated resources and reserves; the grade and recovery of ore which is mined varying from estimates; production rates, methods and amounts varying from estimates; delays in obtaining or failures to obtain required governmental, environmental or other project approvals; inflation; changes in exchange rates; fluctuations in commodity prices; delays in development and other factors described in the public filings made by the Company at www.sedar.com and www.sec.gov. Readers should not place undue reliance on forward-looking statements. The forward-looking statements contained herein are based on the beliefs, expectations and opinions of management as of the date hereof and Ur-Energy disclaims any intent or obligation to update them or revise them to reflect any change in circumstances or in management's beliefs, expectations or opinions that occur in the future.

BIOX CORPORATION SHAREHOLDERS APPROVE PREVIOUSLY ANNOUNCED PLAN OF ARRANGEMENT

BIOX Corporation ("BIOX" or the "Corporation") (TSX: BX) today announces the results of its special meeting (the "Special Meeting") of holders of the common shares of BIOX (the "Shareholders") held today. At the Special Meeting, Shareholders passed a resolution to approve the Corporation's previously announced arrangement under the Canada Business Corporations Act (the "Arrangement") with FP Resources Limited and CFFI Ventures Inc. (collectively, the "Acquiror Group") and 10293547 Canada Limited (the "Purchaser"), a wholly-owned indirect subsidiary of CFFI Ventures Inc. Under the Arrangement, all of the issued and outstanding common shares of BIOX (the "Common Shares") will be acquired by the Purchaser for cash consideration of \$1.23 per Common Share (the "Consideration"), other than

Common Shares held by the Acquiror Group and certain Shareholders which will be exchanged for common shares of the Purchaser pursuant to the Arrangement.

The required shareholder approval thresholds were met, with the Arrangement being approved by (i) approximately 99.95% of the votes cast by Shareholders present in person or represented by proxy at the Special Meeting, and (ii) approximately 99.89% of the votes cast by Shareholders, other than those votes that were required to be excluded for the purposes of minority approval under Multilateral Instrument 61-101 Protection of Minority Security Holders in Special Transactions. Approximately 83.87% of the Common Shares were represented in person or by proxy at the Special Meeting.

Completion of the Arrangement is subject to the receipt of a final order of the Ontario Superior Court of Justice (the "Court"), which is expected to be sought on September 13, 2017. In addition, certain closing conditions customary in transactions of this nature are required in order for the Arrangement to occur. Provided that approval of the Court is granted and all other closing conditions are satisfied or waived, BIOX expects the Arrangement to be completed later in September 2017 and the Common Shares will be de-listed from the

Toronto Stock Exchange thereafter.

About BIOX Corporation

BIOX is a renewable energy company that owns and operates 287.5 million litres of nameplate biodiesel production capacity at plants located in Houston, Texas and two facilities in southern Ontario. BIOX has an innovative, proprietary and patented production process that is capable of producing the highest quality, renewable, clean burning and biodegradable biodiesel fuel utilizing a variety of feedstocks - from pure seed oils to animal fats to recovered vegetable oils with no change to the production process. BIOX's high quality biodiesel fuel meets North American (ASTM D-6751) quality standards.

Forward-looking Statements

This press release contains forward-looking information within the meaning of applicable securities laws that reflects the current expectations of management of BIOX regarding the Arrangement and its consummation, including whether conditions to the consummation of the Arrangement will be satisfied, the final approval of the Arrangement from the Ontario Superior Court of Justice and the timing for completing the Arrangement. X-TERRA RESOURCES DISCOVERS TWO NEW GOLD SHOWINGS ON THE VERONNEAU PROPERTY

X-Terra Resources Inc. (TSXV: XTT) (FRANKFURT: XTR) is pleased to announce it has completed the first phase of its 2017 exploration program on the Veronneau property, which focused on geological and alteration mapping and widespread exploration.

Throughout the first phase of exploration, X-Terra Resources has made the stripping and detailed mapping of the Veronneau showing that led to the discovery of a new

surface gold occurrence in a totally new area while also expanding the Veronneau discovery channel to 4.24 g/t Au over 6 metres.

Parallel to these works, the first exploration phase allowed the teams to cover around 65 percent of the Veronneau property while also gaining a deep understanding of its geological setting. The detailed mapping of the Veronneau showing reveal that the gold mineralization is highly affected by a strong North-East deformation corridor "This corridor is post gold mineralisation and the showing itself is truncated. Outcrops are rare in the vicinity of the deformation corridor but exploration along it led to a gold discovery with the same geochemical signature (Veronneau)" stated Michel Chapdelaine, Vice-President Exploration and development of X-Terra Resources. The showing is located 6.7 km to the North-East of Veronneau and will be expanded upon throughout the second phase of exploration expected to begin in early September 2017. A grab sample from the outcrop returned 1.2 g/t Au. The mineralization consists of approximately 1% disseminated pyrite/arsenopyrite in a slightly foliated mafic rock with 10-15% silica flooding.

A second discovery was made 5.5 kilometres South-West of the Marcaut area and only 1.48 kilometres from the new showing mentioned above. A grab sample from outcrop returned 0.70 g/t Au, 6.2 g/t Ag and 0.1% Cu. The mineralization consists of semi massive pyrite and pyrrhotite and up to 1% chalcopyrite.

Following the new discoveries as well as the newly understood geological context of the western and eastern extension, X-Terra Resources acquired by staking 158 new mining claims bringing the total number of mining claims comprising the Veronneau property to 472 claims, covering an area over 227 square kilometres.

"We are excited with the new discoveries made this early on, and are looking forward to going back into the field to complete our exploration program and acquire more knowledge of the Veronneau property. Once the second phase of our exploration program will be completed, we will be able to determine the final stages of exploration and the drill program which is expected to begin toward the end of 2017" stated Michael Ferreira, President and Chief Executive Officer of X-Terra Resources.

Qualified Person

Mr. Jeannot Théberge, PGeo, a consultant to X-Terra Resources, is

the qualified person for the Veronneau property under National Instrument 43-101 Standards of Disclosure for Mineral Projects responsible for the technical contents of this news release, and has approved the disclosure of the technical information contained herein.

About X-Terra Resources Inc.

X-Terra Resources is a resource company focused on acquiring and exploring energy properties in Canada.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of the release.

GOVERNMENT OF CANADA SIGNALS ACTION TO RESTORE RAIL SERVICE TO CHURCHILL, MANITOBA

The Government of Canada recognizes the important role this rail line plays in connecting communities in northern Manitoba.

Today, the Honourable Jim Carr, Minister of Natural Resources and Member of Parliament for Winnipeg South Centre, signalled the Government's actions toward restoring rail

service to Churchill, Manitoba.

The Government of Canada's top priorities are ensuring that goods and supplies are delivered to those who need them and restoring the Hudson Bay rail line to Churchill.

OmniTRAX Inc. has legal obligations to repair the rail line and its tracks. To this end, we have formally demanded that the Hudson Bay Railway Company repair the rail line in line with the terms of its 2008 contribution agreement with the Government of Canada, which requires the company to operate, maintain and repair the entire Hudson Bay Railway Line in a diligent and timely manner until March 31, 2029.

The Government is willing to look at all options, including exploring the possibility of working with a new owner toward the repair of the rail line. To this end, senior government officials are engaging to find a solution on rail track repairs, ensuring a continuation of rail service for Churchill and surrounding communities.

Quick Facts

The Government is looking at all options to ensure that contracts and obligations are respected and fulfilled, including enforcing its rights under its agreement to seek repayment of the \$18.8 million contributed to the Hudson Bay Railway Line in 2008.

LABORATORY SERVICES

Skystone's state of the art material testing laboratory has been designed to meet the needs of the oil and gas industry. Our engineers have performed thousands of investigations to determine causes of component failures and to prevent future incidents.

The Skystone laboratory can provide services including:

- Failure analyses (pipelines, pressure vessels, downhole equipment)
- Cut-out evaluations
- Fitness-for service assessments
- Finite elemental analyses (FEA) and design verification
- Sweet to sour conversions
- Material testing and selection
