QUÉBEC AND ONTARIO WORKING TOGETHER TO FUEL INNOVATION AND GROWTH

Québec and Ontario held their seventh joint meeting of cabinet ministers in Québec City today, building on a long history of productive partnership between them. The meeting was an opportunity to continue the governments' progress in the areas of innovation, economic growth and climate change.

A new step in accelerating the growth of information and communications technology was taken today as Premier Philippe Couillard and Premier Kathleen Wynne announced a new Memorandum of Understanding that will see Québec and Ontario strengthen their cooperation in the development of Artificial Intelligence. Building on existing investments, the agreement will boost the provinces' competitive advantage in the field of AI by expanding opportunities for collaboration in research, talent attraction, skills development and business growth.

Together, Ontario and Québec will support advancements in the design and commercialization of innovative

technologies, such as autonomous vehicles, speech recognition, fraud detection, and medical imaging and diagnosis. Increasing support for the provinces' already leading-edge advanced technology sector will further attract investments and talent from around the globe while creating highly skilled jobs across Québec and Ontario. The two cabinets discussed the need to deepen understanding of potential social and other impacts of artificial intelligence. Today's announcement also brings a new dimension to the provinces' ongoing high-tech collaboration, particularly in the field of digital communication - 5G networks.

Earlier in the day, the Premiers signed an agreement on climate change with Governor of California Jerry Brown, which reflected the importance of working with U.S. partners. Cabinet ministers also discussed how to sustain and improve relationships with Canada's most important trading partner, building on efforts by Québec and Ontario throughout this year. Special focus was put on NAFTA and Softwood lumber, as negotiators for Québec and Ontario were in attendance to brief both cabinets on the latest developments and next steps in negotiations.

Previous joint meetings between Ontario and Québec have led to advances on common goals of growing the economy, attracting businesses and investments, and protecting our shared environment.

Through their joint meetings of cabinet members and work year-round, Québec and Ontario have strengthened their long-standing relationship, creating opportunities and greater prosperity within the provinces — and across Canada.

DAVIE SHIPBUILDING SPONSORS THE 2017 INVICTUS GAMES

Canada's largest shipbuilder today announced its role as a financial sponsor of the 2017 Invictus Games which supports wounded, sick and injured servicemen and women in their journey to recovery, through the power of sport. The event, which starts tomorrow, will bring together 550 competitors and their families from 17 allied nations.

"Davie is honoured to participate in and sponsor the 2017 Invictus Games in Toronto. The sacrifice and perseverance demonstrated

by these warriors is truly inspiring. Our sponsorship of the event lies at the heart of our purpose as a company whose primary objective it is to support the men and women of the armed forces and coast guard," said Alex Vicefield, Chairman of Davie Shipbuilding, Canada's largest shipbuilder.

Spencer Fraser, CEO of Federal Fleet Services, Davie's sister company and a leading provider of integrated services to the Royal Canadian Navy added "teamwork, leadership and relentlessness are just some of the shared values we have with these incredible athletes. I look forward to cheering the Canadian heroes on tomorrow."

This sponsorship is part of Davie's Corporate Citizenship Program which contributes to the betterment of our stakeholders and the environment. Earlier this year, Davie announced its sponsorship of the Lévis Alimentary Assistance Program which provides struggling families with nutritious meals.

BNK PETROLEUM INC. COMMENCES BROCK 9-2H WELL FRACTURE STIMULATION

BNK Petroleum Inc. (the "Company") (TSX: BKK) is pleased to announce that fracture stimulation completion operations on the previously drilled Brock 9-2H well have commenced.

The fracture stimulation is anticipated to take approximately two weeks, after which the equipment will be removed and the flowback will commence. It has historically taken a few weeks of flowback until stabilized hydrocarbon production occurs.

The Company also announces that the Hartgraves 1-6H well continues to perform well, with production rates staying above both the proved undeveloped and the probable case type curves used to estimate the reserves attributed to the Company's Tishomingo Field. For the last 20 days, the well has averaged over 400 barrels of oil equivalent per day, of which over 80 percent is oil.

About BNK Petroleum Inc.
BNK Petroleum Inc. is an

international oil and gas exploration and production company focused on finding and exploiting large, predominately unconventional oil and gas resource plays. Through its subsidiaries, the Company owns and operates shale oil and gas properties in the United States. Additionally, the Company is utilizing its technical and operational expertise to identify and acquire additional unconventional projects. The Company's shares are traded on the Toronto Stock Exchange under the stock symbol BKK and on the OTCQB under the stock symbol BNKPF.

Cautionary Statements

In this news release and the Company's other public disclosure: The references to barrels of oil equivalent ("Boes") reflect natural gas, natural gas liquids and oil. Boes may be misleading, particularly if used in isolation. A Boe conversion ratio of 6 Mcf:1 Bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value. Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. There is a 10% probability that the quantities actually recovered will equal or exceed the sum of proved plus probable plus possible reserves. Readers should be aware that references to initial production rates and other short-term production rates are preliminary in nature and are not necessarily indicative of long-term performance or of ultimate recovery. Readers are referred to the full description of the results of the Company's December 31, 2016 independent reserves evaluation and other oil and gas information contained in its Form 51-101F1 Statement of Reserves Data and Other Oil and Gas Information for the year ended December 31, 2016, which the Company filed on SEDAR on March 23, 2017.

Caution Regarding Forward-Looking Information

Certain statements contained in this news release constitute "forward-looking information" as such term is used in applicable Canadian securities laws, including statements regarding the timing of and expected results from planned Caney wells development. Forward-looking information is based on plans and estimates of

management and interpretations of data by the Company's technical team at the date the data is provided and is subject to several factors and assumptions of management, including that that indications of early results are reasonably accurate predictors of the prospectiveness of the shale intervals, that required regulatory approvals will be available when required, that no unforeseen delays, unexpected geological or other effects, including flooding and extended interruptions due to inclement or hazardous weather conditions, equipment failures, permitting delays or labor or contract disputes are encountered, that the development plans of the Company and its co-venturers will not change, that the offset operator's operations will proceed as expected by management, that the demand for oil and gas will be sustained, that the Company will continue to be able to access sufficient capital through financings, farm-ins or other participation arrangements to maintain its projects, and that global economic conditions will not deteriorate in a manner that has an adverse impact on the Company's business, its ability to advance its business strategy and the industry as a whole. Forward-looking information is subject to a variety of risks and uncertainties and other factors that could cause plans, estimates and actual results to vary materially from those projected in such forward-looking information. Factors that could cause the forward-looking information in this

news release to change or to be inaccurate include, but are not limited to, the risk that any of the assumptions on which such forward looking information is based vary or prove to be invalid, including that the Company or its subsidiaries is not able for any reason to obtain and provide the information necessary to secure required approvals or that required regulatory approvals are otherwise not available when required, that unexpected geological results are encountered, that equipment failures, permitting delays or labor or contract disputes or shortages are encountered, the risks associated with the oil and gas industry (e.g. operational risks in development, exploration and production; delays or changes in plans with respect to exploration and development projects or capital expenditures; the uncertainty of reserve and resource estimates and projections relating to production, costs and expenses, and health, safety and environmental risks, including flooding and extended interruptions due to inclement or hazardous weather conditions), that the offset operator's operations have unexpected adverse effects on the Company's operations, that completion techniques require further optimization, that production rates do not match the Company's assumptions, that very low or no production rates are achieved, that the Company is unable to access required capital, that occurrences such as those that are assumed will not occur, do in fact occur,

BALANCING POOL PROVIDES NOTICE TO TERMINATE THE SUNDANCE ALBERTA POWER PURCHASE ARRANGEMENTS

TransAlta Corporation ("TransAlta" or the "Company") (TSX: TA; NYSE: TAC) announced today that it has received formal notice from the Balancing Pool for the termination of the Alberta Power Purchase Arrangements ("PPAs") for Sundance Unit B and Unit C effective March 31, 2018.

The termination of the Sundance PPAs by the Balancing Pool was expected and TransAlta anticipates working closely with the Balancing Pool to ensure the company receives the termination payment that it believes it is entitled to under the PPAs and applicable legislation. The expected impacts to TransAlta of the termination include:

Approximately \$231 million in compensation for the net book value of the assets as compared to the Balancing Pool's estimate of approximately \$171 million. The Balancing Pool's estimate differs because it excludes certain assets which TransAlta believes should be included in the net book value calculation.

Increased operational flexibility, including with respect to dispatching of generation from the affected units, maintenance and turnaround schedules, and the timing of the coal-to-gas conversions.

A neutral to positive financial impact as the termination payments will be used to repay debt maturing in 2018.

TransAlta believes that the cash flow generated by its portfolio of coal, gas and renewable assets in

Alberta will be maintained following the termination of the PPAs.

The Balancing Pool's decision does not change TransAlta's commitment to continue to be a low cost, reliable supplier of electricity with over 2,300 MW of gross capacity under Alberta PPAs, representing approximately 14% of the generation capacity in Alberta.

About TransAlta Corporation:

TransAlta is a power generation and wholesale marketing company focused on creating long-term shareholder value. TransAlta maintains a low-to-moderate risk profile by operating a highly contracted portfolio of assets in Canada, the United States and Australia. TransAlta's focus is to efficiently operate wind, hydro, solar, natural gas and coal facilities in order to provide customers with a reliable, low-cost source of power. For over 100 years, TransAlta has been a responsible operator and a proud contributor to the communities in which it works and lives. TransAlta has been recognized on CDP's Canadian Climate Disclosure Leadership Index (CDLI), which includes Canada's top 20 leading companies reporting on climate change, and has been selected by Corporate Knights as one of Canada's Top 50 Best Corporate Citizens and is recognized globally for its leadership on sustainability and corporate responsibility standards by FTSE4Good.

For more information about TransAlta, visit our web site at transalta.com, or follow us on Twitter @TransAlta.

Forward-Looking Statements

This news release contains forward-looking statements within the meaning of applicable securities laws, including statements regarding: the termination of the PPAs; the net book value of the Company's generating facilities and the amount of any termination payment; the use of proceeds received in connection with any termination of the PPAs; and the impact the termination of the PPAs will have on the Company, including as it pertains to increasing operational flexibility, including with respect to dispatching of generation from the affected units, maintenance and turnaround schedules and the timing of the coal-to-gas conversion. These statements are based on TransAlta's belief and assumptions based on information available at the time the assumptions were made. These statements are subject to a number of risks and uncertainties that may cause actual results to differ materially from those contemplated by the forward-looking statements. Some of the factors that could

cause such differences include: the outcome of our dispute relating to the net book value payable upon termination of the PPAs; legislative or regulatory changes; and changes to power prices or operating costs. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect TransAlta's expectations only as of the date of this news release. TransAlta disclaims any intention or obligation to update or revise these forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Note: All financial figures are in Canadian dollars unless otherwise indicated.

BALLARD INVITED TO JOIN WORLD HYDROGEN COUNCIL

Ballard Power Systems (NASDAQ: BLDP; TSX: BLDP) today announced that it has been invited to join the internationally-recognized Hydrogen Council (www.hydrogencouncil.com) as a supporting member, with the company's membership effective today. The Hydrogen Council is a global CEO-level

advisory body providing long-term vision on the important role of hydrogen technologies toward an energy transition.

As the first global initiative of its kind, the Hydrogen Council was launched at the World Economic Forum 2017, in Davos, Switzerland.

The objectives of the Hydrogen Council are to:

Increase visibility of hydrogen solutions currently available and the progress that has been made in this regard;

Advocate for the important role of hydrogen technologies in helping meet climate goals, energy security and competitiveness targets;

Work towards better deployment conditions; and

Work with and provide recommendations to key stakeholders, such as policy makers, the business community, international agencies and civil society.

The Hydrogen Council is currently comprised of CEOs from these member companies: Air Liquide, Alstom, Anglo American, Audi, BMW GROUP, Daimler, ENGIE, Honda, Hyundai, Iwatani, Kawasaki, Plastic Omnium, Shell, The Linde Group, Total and Toyota.

LABORATORY SERVICES

Skystone's state of the art material testing laboratory has been designed to meet the needs of the oil and gas industry. Our engineers have performed thousands of investigations to determine causes of component failures and to prevent future incidents.

The Skystone laboratory can provide services including:

- Failure analyses (pipelines, pressure vessels, downhole equipment)
- Cut-out evaluations
- Fitness-for service assessments
- Finite elemental analyses (FEA) and design verification
- Sweet to sour conversions
- Material testing and selection

Contact us at 403-230-3552 or lab@skystone.ca

Randy MacEwen, Ballard President and CEO said, "We are pleased to join the Hydrogen Council as a supporting member. The strong leadership and coordination of the Hydrogen Council will play a key role in promoting the commercialization and scaled adoption of hydrogen fuel cell products for motive applications. As an industry we are moving toward a critical junction in industry development. We require strong industry collaboration throughout the value chain and ecosystem to drive holistic solutions, high performance and compelling economic value propositions that support decarbonization and improved air quality."

The Hydrogen Council convened in New York City today, on the occasion of the NYC Climate Week, to host an exclusive event with C-suite industry leaders, investors and other stakeholders. The objective of this event was to discuss the important contribution of hydrogen to the energy transition and to work to create an effective implementation plan, so that the compelling benefits of hydrogen deployment can be reaped.

About Ballard Power Systems
Ballard Power Systems (NASDAQ: BLDP; TSX: BLDP) provides clean energy products that reduce customer costs and risks, and helps customers solve difficult technical and business challenges in their fuel cell programs. To learn more about Ballard, please visit www.ballard.com.

**FOREST MINISTERS
RENEW COMMITMENTS
AND LAY
GROUNDWORK FOR
BIOECONOMY FUTURE
CANADIAN COUNCIL
OF FOREST MINISTERS'
MEETING 2017**

Supported by the Canadian Council of Forest Ministers (CCFM), Canada's forest industries play a central role in combatting climate change, risk of forest fires, driving innovation, expanding trade, supporting biodiversity and creating jobs.

The CCFM agreed today to address the future forest bioeconomy, climate change, innovation and opportunities to support the management of caribou habitat – a top priority for the forest sector. Ministers also received an update from Minister Freeland on the softwood lumber dispute and reinforced the need for governments and industry to work together on this important file.

Chaired by the Honourable Jim Carr, Canada's Minister of Natural Resources, the Council unanimously endorsed A Forest Bioeconomy Framework for Canada. The Framework outlines a bold new vision for the future of the forest sector and the role for biomass in the transition to a low-carbon, sustainable economy. It is a non-binding commitment among CCFM partners and specific pathways may be endorsed, adopted and mobilized by jurisdictions accordingly. Leveraging this forest bio-based advantage will help spur innovation, investment, research, and partnerships.

Ministers discussed the need to work with Indigenous peoples, stakeholders and industry to protect and recover woodland caribou populations. They agreed on the importance of taking a collaborative, science-based approach and sharing best practices to help support conservation agreements while considering the socio-economic benefits of the forest sector for communities.

The Council endorsed the Forest Ministerial Progress Report to First Ministers on the implementation of the Pan-Canadian Framework on Clean Growth and Climate Change, which highlights progress made on the path to Canada's low-carbon future.

As well, Ministers and Indigenous leaders had the opportunity to discuss important forest sector issues with industry representatives and forest sector stakeholders during the Forum of Canadian Forests. Ministers heard various perspectives on a range of issues and discussed how to increase collaboration to meet common goals.

Given that 70 percent of Indigenous communities in Canada are located in forested areas, participants outlined opportunities for greater collaboration with Indigenous peoples in environmental monitoring and assessment activities, as well as approaches for fostering Indigenous youth participation in the forest sector.

Ministers also recognized the hard work and sustained efforts by personnel combatting this summer's intense forest fires and agreed to advance the implementation of the Canadian Wildland Fire Strategy – a key commitment from the 2016 CCFM meeting in Dawson City, Yukon, and that outlines actions to prepare for and mitigate wildland fire risks across Canada.

At the conclusion of the Meeting, Minister Carr passed the rotating chair of the Council to his colleague, Nova Scotia Minister Margaret Miller.

Q u o t e s

"During the past two days, governments, Indigenous leaders, industry and stakeholders have demonstrated that Canada's forests – creators of jobs and drivers of innovation – are a common priority. While challenges lie ahead, I have no doubt that working together we can address them to ensure the strength of Canada's forest industry for generations to come."

Jim Carr
Canada's Minister of Natural Resources.

"Nova Scotia is delighted and honoured to be hosting the 2018 Canadian Council of Forest Ministers. As incoming chair, I look forward to continuing our productive and meaningful discussions on the sustainable management of our forests."

Margaret Miller
Nova Scotia's Minister of Natural Resources.

**ENERPLUS
ANNOUNCES CASH
DIVIDEND FOR
OCTOBER 2017**

Enerplus Corporation ("Enerplus") (TSX & NYSE: ERF) announces that a cash dividend in the amount of CDN\$0.01 per share will be

payable on October 13, 2017 to all shareholders of record at the close of business on September 28, 2017. The ex-dividend date for this payment is September 27, 2017.

The CDN\$0.01 per share dividend is equivalent to approximately US\$0.01 per share if converted using the current Canadian/US dollar exchange rate of 0.8209. The U.S. dollar equivalent dividend will be based upon the actual Canadian/US exchange rate applied on the payment date and will be net of any Canadian withholding taxes that may be applicable. Dividends paid by Enerplus are considered an "eligible dividend" for Canadian tax purposes. For U.S. income tax purposes, Enerplus' dividends are considered "qualified dividends".

For further information, including financial and operating results and our most recent corporate presentation, please visit our website at www.enerplus.com or phone 1-800-319-6462. Shareholders may, upon request, obtain a hard copy of Enerplus' complete audited financial statements free of charge.

About Us
Enerplus Corporation is a responsible developer of high quality crude oil and natural gas assets in Canada and the United States committed to creating value for its shareholders through a disciplined capital investment strategy.

PARLIAMENTARY SECRETARY RUDD HOSTS MEETING TO PROMOTE NUCLEAR ENERGY IN INTERNATIONAL CLEAN ENERGY EFFORTS

Canada's nuclear industry will play a key role in driving innovation and expanding Canada's clean energy mix as the world transitions toward a low-carbon economy.

Kim Rudd, Parliamentary Secretary to Canada's Minister of Natural Resources, the Honourable Jim Carr, and colleagues from the United States and Japan today co-hosted a side event at the International Atomic Energy Agency (IAEA) 61st General Conference in Vienna, Austria, to discuss opportunities to raise the profile of nuclear energy in multinational clean energy forums. At the event, where Ms. Rudd served as head of the Canadian delegation, there was broad agreement among participants to work together to ensure that nuclear energy collaboration is pursued under the Clean Energy Ministerial (CEM).

Nuclear energy enables safe, reliable, competitive and clean energy solutions that support economic development, energy security and environmental objectives. The scale and sophistication of nuclear research and development, coupled with the need for strong government-to-government involvement in nuclear relationships, make multilateral collaboration a key factor in advancing innovative nuclear energy technologies.

Canada is taking a leadership role through the CEM to raise the profile of nuclear energy in international discussions and efforts on climate change and clean energy. Canada, the United States and Japan intend to co-sponsor the development of a nuclear energy work stream under the Clean Energy Ministerial Framework to be launched at the next CEM meeting, which will be hosted jointly by the European Commission, Denmark, Finland, Norway and Sweden in 2018. Canada will host the CEM in 2019.

Q u o t e
"Canada is pleased to work with colleagues from the United States and Japan to promote the importance of nuclear energy in clean energy innovation. Canada has vast expertise and technological capacity

in the nuclear sector, and, as part of our government's commitment to the industry, we are pursuing new opportunities for international collaboration in this important area."

TERRAVEST CAPITAL INC. ANNOUNCES ACQUISITION OF FISCHER TANKS

TerraVest Capital Inc. (TSX:TVK) (the "Company" or "TerraVest") announced today that a wholly-owned subsidiary of the Company has acquired all of the assets of Fischer Tanks LLC and affiliated companies (Fischer), a privately-owned Kaleva, Michigan based company primarily focused on refurbishing and manufacturing domestic propane tanks for the US and Canadian Markets. It also has its own fleet of trucks and trailers.

The acquisition of Fischer enhances TerraVest's position as a leader in the North American propane industry, providing customers with full scope services including the manufacturing of domestic propane tanks, large storage vessels, trailers and bobtails as well as the refurbishment of used propane tanks.

According to Doug Fischer, General Manager of Fischer, "Joining forces with TerraVest is a natural fit that allows us to provide customers with additional products and services from TerraVest's market leading propane subsidiaries. Tank refurbishment complements TerraVest's current product offerings and I feel confident that we will ensure the continuity at Fischer by maintaining jobs, upholding product quality standards, caring for clients, and building out our expertise for customers."

Dustin Haw, CEO of TerraVest, added that "Fischer Tanks is a great addition to our company and I am pleased to welcome Fischer employees. Fischer is an industry leader in propane tank refurbishing. This acquisition aligns well with our core competencies and greatly enhances

our product offering to customers."

About TerraVest Capital Inc.

TerraVest Capital is an Industrial Manufacturer focused on acquiring businesses with strong cash flow generation, operating success, strong balance sheets and committed management teams. We are focused on creating value for shareholders through our existing lines of business as well as acquiring additional businesses with stable cash flows and potential for growth through our support. The Company is focused on evaluating opportunities that reside manufacturing of tanks and fuel containment vessels as well as the fabrication of oil and gas processing equipment where expertise in metal fabrication and welding are required.

IKKUMA ANNOUNCES FILING OF AMENDED MCR

Ikkuma Resources Corp. ("Ikkuma" or the "Corporation") (TSX VENTURE: IKM) announces that it has filed an amended and restated material change report dated September 22, 2017 (the "Amended MCR"). The Amended MCR supersedes and replaces the Corporation's material change report dated August 18, 2017 (the "Original MCR"). The information presented in the Amended MCR is presented as of August 18, 2017, the date of the Original MCR. The Amended MCR: (i) removes disclosure of

pro forma reserves based on reserves information that are as of different effective dates and related disclosure; (ii) updates references to "cash flow per share" to "funds from operations per share"; (iii) provides additional assumptions used in determining funds from operations and operating netback disclosure; and (iv) updates the table under the heading "Pro Forma Information" to remove disclosure of Adjusted Debt/EBITDA. A copy of the Amended MCR is available under the Corporation's profile on www.sedar.com.

About Ikkuma Resources Corp.

Ikkuma Resources Corp. is a diversified junior public oil and gas company listed on the TSX Venture Exchange under the symbol "IKM", with holdings in both conventional and unconventional projects in Western Canada. The technical team has worked together for over a decade in the Foothills Region of Western Canada, through two successful, publicly traded companies. The unique skills and repeat success at exploiting a complex, potentially prolific play type are fundamental ingredients for a successful growth-oriented company in Western Canada. Corporate information can be found at: www.ikkumarescorp.com.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
