Amazing Energy Appoints Willard G. McAndrew, III as Chief Executive Officer

Amazing Energy Retains MZ Group as Its Investor Relations Advisor About Amazing Energy Oil and Gas

Amazing Energy Oil and Gas, Co. is an independent oil and gas exploration and production company based in Amarillo, TX. The Company operates leaseholds in the Permian Basin of West Texas where it holds the rights to a 70,000-acre leasehold in Pecos County, TX as well as Mid-Continent leaseholds in Kansas. The Company primarily engages in the acquisition and exploitation of oil and natural gas properties with a focus on well-defined plays containing stacked pay zones. More information may be found on Amazing Energy's website at www.amazingenergy.com.

Forward-Looking Statements Certain statements included in this press release are intended as "forward-looking statements." These statements include assumptions, expectations, predictions, intentions or beliefs about future events. Amazing Energy cautions that actual future events and results may vary materially from those expressed

or implied in any forward-looking statements. Information concerning these and other factors can be found in the Company's filings with the SEC, including its Forms 10-K, 10-Q and 8-K, which can be obtained on the SEC's website at http://www.sec.gov.

Any forward-looking statements made in this press release speak only as of the date of this release and, except as required by law, Amazing Energy undertakes no obligation to update any forward-looking statements contained in this press release, even if the Company's expectations or any related events, conditions or circumstances change.

Available at VirtualInvestorConferences.com

Since 2010, VirtualInvestorConferences.com, created by BetterInvesting (NAIC) and PRNewswire, has been the only monthly virtual investor conference series that provides an interactive forum for presenting companies to meet directly with investors using a graphically-enhanced online platform.

Designed to replicate the look and feel of location-based investor conferences, Virtual Investor Conferences unites PR Newswire's leading-edge online conferencing and

investor communications capabilities with BetterInvesting's extensive retail investor audience network.

CONA RESOURCES LTD. ANNOUNCES APPOINTMENT OF PRESIDENT AND CHIEF EXECUTIVE OFFICER

Cona Resources Ltd. ("Cona" or the "Company") (TSX: CONA) is pleased to announce that Cona's Board of Directors is appointing Rob Morgan as President and Chief Executive Officer of the Company. Mr. Morgan has over 30 years' experience with a broad background including Saskatchewan heavy oil and Enhanced Oil Recovery. Most recently, he served as Senior Vice President and Chief Operating Officer with Crew Energy Inc., a publicly traded Canadian oil and gas company. He will assume his role with Cona in the next several weeks upon fulfilling his existing employment obligations at which time John Rooney will step down as CEO and be available for transition as needed. The Company would like to thank

John for his strong leadership over the past seven years and wish him the best in his future endeavours.

Prior to his position with Crew, Mr. Morgan was Chief Operating Officer for Harvest Operations Corp. following progressively more senior positions in operations and business development at Viking Energy Royalty Trust, Canadian Natural Resources Limited, Petrovera Resources, PanCanadian Petroleum Limited and CS Resources Limited. Throughout his career, Mr. Morgan has been involved in managing and optimizing large original oil in place reservoirs similar to Cona's, in a variety of fields across Saskatchewan, Alberta and British Columbia.

Mr. Morgan graduated from the University of Saskatchewan with a Bachelor of Science degree in Chemical Engineering and is a member of the Association of Professional Engineers and Geoscientists of Alberta (APEGA).

Adam Waterous, Chairman of the Company, said "We are thrilled to have Rob join Cona as our new CEO. Rob's long track record of operational success and value creation in heavy oil and Enhanced Oil Recovery make him an ideal fit for our team. Rob's appointment is an important milestone in Cona's strategic vision of maximizing oil recovery from our low-decline, high free cash flow assets, and we believe his enthusiasm, character, and leadership will be an energizing force for our team going forward."

Cona Resources Ltd. Cona is a Canadian crude oil production and development company focused on maximizing oil recovery from its large-scale oil resource base. The Company's operations, infrastructure and concentrated land position are focused in southwest Saskatchewan. Cona's common shares trade on the Toronto Stock Exchange under the symbol CONA. SOURCE Cona Resources Ltd.

BNK PETROLEUM INC. ANNOUNCES INITIAL PRODUCTION OF 730 BOEPD FROM THE BROCK 9-2H WELL

BNK Petroleum Inc. (the "Company") (TSX: BKK) is pleased to announce that the Brock 9-2H well (100% working interest) averaged about 730 Barrels of oil equivalent per day (BOEPD), of which 625 barrels are oil, for the last 5 days, while still producing back completion fluid. The production from the well, which is located in BNK's Tishomingo field, in the SCOOP region of Oklahoma, is currently over 600 BOEPD, of which 520 barrels are oil (87%) and appears to be stabilizing.

Commenting on the announcement, Wolf Regener, President and CEO, said: "Our Brock 9-2H well is currently producing oil at rates that are 39 percent higher than the possible type curve used to estimate the

reserves attributed to the Company's Tishomingo Field. If the production follows a similar path to our previous well, the Hartgraves 1-6H, then it should have an excellent 30-day initial production (IP) rate, well over the possible type curve.

"The Brock 9-2H well was identified as a possible location on our year end 2016, NI 51-101 reserve report and is about a mile east of the closest proved location on that reserves report. This well demonstrates the excellent production that is achievable as we continue to expand our drilling in the field further east.

"This outstanding result comes in addition to the strong results from our previous well, the Hargraves 1-6H. The Hargraves 1-6H well produced a 30-day IP rate of 385 BOEPD (317 barrels oil), which oil rate is above the probable type curve used to estimate the Company's reserves. These two wells bring our current production to over 1,800 BOEPD which has significantly increased our cash flow."

About BNK Petroleum Inc. BNK Petroleum Inc. is an international oil and gas exploration and production company focused on finding and exploiting large, predominately unconventional oil and gas resource plays. Through its subsidiaries, the Company owns and operates shale oil and gas properties in the United States. Additionally, the Company is utilizing its technical and operational expertise to identify and acquire additional unconventional projects. The Company's shares are traded on the Toronto Stock

Exchange under the stock symbol BKX and on the OTCQB under the stock symbol BNKPF.

Cautionary Statements

In this news release and the Company's other public disclosure: The references to barrels of oil equivalent ("Boes") reflect natural gas, natural gas liquids and oil. Boes may be misleading, particularly if used in isolation. A Boe conversion ratio of 6 Mcf:1 Bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value. Possible reserves are those additional reserves that are less certain to be recovered than probable reserves. There is a 10% probability that the quantities actually recovered will equal or exceed the sum of proved plus probable plus possible reserves. Readers should be aware that references to initial production rates and other short-term production rates are preliminary in nature and are not necessarily indicative of long-term performance or of ultimate recovery. Readers are referred to the full description of the results of the Company's December 31, 2016 independent reserves evaluation and other oil and gas information contained in its Form 51-101F1 Statement of Reserves Data

and Other Oil and Gas Information for the year ended December 31, 2016, which the Company filed on SEDAR on March 23, 2017.

Caution Regarding Forward-Looking Information

Certain statements contained in this news release constitute "forward-looking information" as such term is used in applicable Canadian securities laws, including statements regarding the timing of and expected results from planned Caney wells development. Forward-looking information is based on plans and estimates of management and interpretations of data by the Company's technical team at the date the data is provided and is subject to several factors and assumptions of management, including that that indications of early results are reasonably accurate predictors of the prospectiveness of the shale intervals, that required regulatory approvals will be available when required, that no unforeseen delays, unexpected geological or other effects, including flooding and extended interruptions due to inclement or hazardous weather conditions, equipment failures, permitting delays or labor or contract disputes are encountered, that the development plans of the Company and its co-venturers will not change, that the offset operator's operations will proceed as expected by management, that the demand for oil and gas will be sustained, that the Company will continue to be able to access sufficient capital through financings, farm-ins or other participation arrangements to maintain its projects, and that global economic conditions will not deteriorate in a manner that has an adverse impact on the Company's business, its ability to advance its business strategy and the industry as a whole. Forward-looking information is subject to a variety of risks and uncertainties and other factors that could cause plans, estimates and actual results to vary materially from those projected in such forward-looking information. Factors that could cause the forward-looking information in this news release to change or to be inaccurate include, but are not limited to, the risk that any of the assumptions on which such forward looking information is based vary or prove to be invalid, including that the Company or its subsidiaries is not able for any reason to obtain and provide the information necessary to secure required approvals or that required regulatory approvals are otherwise not available when required, that unexpected geological results are encountered, that

equipment failures, permitting delays or labor or contract disputes or shortages are encountered, the risks associated with the oil and gas industry (e.g. operational risks in development, exploration and production; delays or changes in plans with respect to exploration and development projects or capital expenditures; the uncertainty of reserve and resource estimates and projections relating to production, costs and expenses, and health, safety and environmental risks, including flooding and extended interruptions due to inclement or hazardous weather conditions), that the offset operator's operations have unexpected adverse effects on the Company's operations, that completion techniques require further optimization, that production rates do not match the Company's assumptions, that very low or no production rates are achieved, that the Company is unable to access required capital, that occurrences such as those that are assumed will not occur, do in fact occur, and those conditions that are assumed will continue or improve, do not continue or improve, and the other risks and uncertainties applicable to exploration and development activities and the Company's business as set forth in the Company's management discussion and analysis and its annual information form, both of which are available for viewing under the Company's profile at www.sedar.com, any of which could result in delays, cessation in planned work or loss of one or more concessions and have an adverse effect on the Company and its financial condition. The Company undertakes no obligation to update these forward-looking statements, other than as required by applicable law.

CANADIANS GIVE VOICE TO A VISION FOR CANADA'S ENERGY FUTURE

Generation Energy has helped launch Canada on its way to a stronger economy, healthier communities and a more sustainable future for generations to come.

More than 600 top experts, industry representatives, traditional and emerging energy sectors, and Indigenous and community leaders from across the country and around the globe gathered in Winnipeg for the Conversation of a Generation on how Canada is preparing for the reliable, affordable, low-carbon energy economy of the future.

Hosted by Canada's Minister of

Natural Resources, the Honourable Jim Carr, the interactive forum was the culmination of a six-month engagement that touched more than 350,000 people through online participation, as well as in-person panels and workshops.

Discussions at the forum reflected the appetite Canadians have shown for helping to shape their energy future.

The indisputable take-away was that global energy markets are rapidly changing, the energy transition is already underway and the energy mix will change. However, the pace and scope are uncertain, so long-term, predictable, inclusive policy direction will be integral to the transition.

This presents a tremendous opportunity: as a global energy player, Canada is positioned to contribute to global energy security and benefit from the energy transition through innovation and trade.

The participants said there is no single solution, because all energy sources are part of the path forward. Canada's energy future is likely to be as diverse as its people. As a result, they agreed that the policy approach will need to emphasize bold leadership and action, risk-taking, entrepreneurship and the creation of new energy industries.

Collaboration among all levels of government, as well as inclusion of diverse views and meaningful engagement with Indigenous peoples will be needed.

The feedback from the forum, as well as that gathered over the

last six months, will help to define Canada's energy future for the next generation, as the Government develops an energy policy direction to complement the work being done by the provinces and territories.

Quote

"We have a unique moment to set out ambitions for this generation and the next with regard to energy policy. This will be a challenge, but it's clear to me that Canada needs to use this opportunity to set a path forward so we can maximize our energy advantage through bold political leadership supported by the people to whom we are accountable."

Jim Carr

Canada's Minister of Natural Resources

PURE TECHNOLOGIES COMPLETES LONGEST, SINGLE PIPELINE INSPECTION TO DATE USING ITS PIPE-DIVER CONDITION ASSESSMENT TECHNOLOGY

Pure Technologies Ltd. ("Pure" or the "Company") (TSX: PUR) recently completed the longest, single deployment of its PipeDiver™

LABORATORY SERVICES

Skystone's state of the art material testing laboratory has been designed to meet the needs of the oil and gas industry. Our engineers have performed thousands of investigations to determine causes of component failures and to prevent future incidents.

The Skystone laboratory can provide services including:

- Failure analyses (pipelines, pressure vessels, downhole equipment)
- Cut-out evaluations
- Fitness-for service assessments
- Finite elemental analyses (FEA) and design verification
- Sweet to sour conversions
- Material testing and selection

Contact us at 403-230-3552 or lab@skystone.ca

inspection platform to date on a critical water pipeline that runs over 70 kilometers (44 miles) through the Rocky Mountains of Colorado About Homestake Water Project Colorado Springs and the City of Aurora are the second and third largest communities in the state of Colorado. The Homestake Water Project ("Homestake") is a joint venture between the two cities to transport water between the communities that serve almost 1 million people.

The Homestake Water Project includes a collection system, a series of reservoirs, a tunnel that brings water through the continental divide and a pump station that helps deliver up to 120 million gallons of water per day.

One of the pipelines managed by Homestake includes the 70 km Otero Discharge Pipeline, a large diameter (66-inch) non-cylinder prestressed concrete pipeline (PCP) built in the early 60s. The line, which provides 60 to 70 percent of the water to Colorado Springs and Aurora, is in a high-risk location, with few roads and steep inclines, and recently the pipeline has suffered major failures.

Beginning ten years ago, over a five-year period, Homestake shut down the Otero Discharge Pipeline each September to perform a condition assessment on certain sections of the pipeline. The shutdown included two weeks just to drain the pipeline to prepare it for a manned electromagnetic inspection tool, and another two weeks to perform the inspection. Pure's PipeDiver tool was selected due its ability to deliver high resolution data on this critical pipeline without the need for dewatering, a significant time and cost saving, while improving safety for those involved in the inspection.

"As the pipeline slices through the Rocky Mountains, safety is a major issue because of the rough terrain," says Tom Hankins, Supervisor for Homestake Water Project. "This task is hazardous, not just to the mobilization crews, but also to the inspection teams inside the pipe who required rope support on the steep slopes."

The proposed inspection was a technically challenging, high-risk project. The teams put more than six months of planning into the inspection logistics, and Pure Technologies worked closely with Homestake to ensure existing facilities would be used for the tool's insertion and extraction.

At over 70 kms long, the PipeDiver inspection was recognized as the longest single-day run for the tool

in the history of the Company. Homestake will soon have critical information on the areas of concern on the pipeline, which in turn, will drive repair/replacement decisions for the proactive water authority.

About Pure Technologies Ltd.

Pure Technologies Ltd. is an international asset management, technology and services company which has developed patented technologies for inspection, monitoring and management of critical infrastructure around the world. Pure's business model incorporates four distinct but complementary business streams:

Sales of proprietary monitoring technologies for pipelines, bridges and structures;

Recurring revenue from data analysis, site maintenance, and from technology licensing;

Premium technical services including pipeline inspection, leak detection and condition assessment;

Specialized engineering services in areas related to asset management, primarily in the area of pipeline condition assessment for water and wastewater infrastructure.

RENAISSANCE ANNOUNCES STRATEGIC INVESTMENT BY, AND PARTNERSHIP WITH, ESKANDAR MALEKI

Renaissance Oil Corp. ("Renaissance" or the "Company") (TSX-V: ROE) is pleased to announce that it has agreed to issue to Eskandar Maleki 17,391,304 units at a price of C\$0.1725 per unit for gross proceeds to the Company of C\$3 million (the "Investment"). Each unit comprises one common share of Renaissance (each, a "Share" and, collectively, the "Shares") and one common share purchase warrant (each, a "Warrant" and, collectively, the "Warrants"), each Warrant exercisable to acquire one additional common share of Renaissance at a price of C\$0.50 for three years. In addition, an associate of Mr. Maleki will be purchasing a further 869,565 of the units for C\$150,000.

In connection with the Investment, and subject to regulatory and shareholder approvals, including acceptance by the TSX Venture Exchange, the Company has agreed to provide performance-based compensation to Mr. Maleki in the form of common shares for value created for the Company as a result of securing

oil and gas opportunities in Mexico.

Eskandar Maleki has a strong track record of building successful oil and gas companies, most notably, Tullow Oil PLC. Mr. Maleki was an early strategic investor, board member and, for a time, the largest individual shareholder of Tullow. He was instrumental in the company's corporate development as it grew into a leading independent oil and gas exploration and production company. With interests in over 85 exploration and production licences across 17 countries, Tullow's market capitalization rose from £30 million to over £20 billion.

Craig Steinke, Chief Executive Officer of Renaissance, stated: "We are extremely pleased to have Eskandar as a strategic partner and look forward to accelerating our growth in Mexico with the objective of creating significant value for our shareholders."

It is expected that the Investment will be completed on or about October 16, 2017, subject to acceptance by the TSX Venture Exchange. The proceeds from the Investment will be used to acquire additional oil and gas rights in Mexico and for general corporate purposes.

All of the securities issued under this transaction will be subject to a hold period of four months and one day from issuance, in accordance with applicable Canadian securities laws.

Immediately prior to completing the Investment, Mr. Maleki did not own any securities of Renaissance. Pursuant to the Investment, Mr. Maleki will acquire 17,391,304 Shares and 17,391,304 Warrants, as described above, representing approximately 7.61% of the issued and outstanding common shares of Renaissance on a non-diluted basis (approximately 14.14% of the issued and outstanding common shares of Renaissance on a partially-diluted basis). Mr. Maleki's decision to complete the Investment was made in the context of his overall investment purposes. He will continue to review his investment alternatives from time to time and may determine to increase or decrease his equity ownership in Renaissance through the acquisition or sale of additional outstanding common shares or other securities of Renaissance, either through open market or privately negotiated transactions in accordance with applicable securities laws. Renaissance's head office is located at Suite 3123, Three Bentall Centre, 595 Burrard Street, Vancouver, BC, V7X 1J1, Canada. Mr. Maleki is a resident in Monaco. An early warning report in respect of the Investment will be filed under Renaissance's profile on SEDAR at www.sedar.com, and may also be obtained by contacting the person named below.

INNOVA GLOBAL EXPANDS GLOBAL REACH BY ACQUIRING BRADEN

INNOVA Global Ltd. (INNOVA), an international leader in emissions and noise control, announced today that it has acquired the shares of the multinational gas turbine auxiliary equipment specialist, Braden, from Global Power Equipment Group. The acquisition includes Braden Manufacturing LLC (BUSA) in Tulsa, Consolidated Fabricators (CFI) in Auburn, Massachusetts and Braden-Europe (BEUR) located in Heerlen, the Netherlands.

The acquisition of Braden allows INNOVA to expand its global reach with added market presence in North, Central and South America, as well as Europe, the Middle East, North Africa, China and Australasia.

INNOVA's President and CEO Harry Wong said the combination of INNOVA and Braden brings together strong project experience and the product offering of two global leaders in their fields. "As a result of this transaction, INNOVA will expand its international footprint into Europe, China, the Middle East and North Africa as well as strengthen its presence in the US and the Americas", Mr. Wong said. "Importantly, the clients of the combined entity will benefit greatly from the breadth of prequalified product designs and solutions to service its clients worldwide."

"We look forward to strengthening our operations through extension of the technical capabilities, global supply chain, and expansion of product offerings through the combined INNOVA-Braden team," he said.

"Similarly, we also plan to work with the strong CFI team to strengthen its product offering to existing clients and to manufacture some of their current specialized parts."

"Braden Europe provides INNOVA with an important base within the European Union and a pathway to offer additional products and services to clients within BEUR's geographical markets."

Braden has a unique gas turbine aftermarket retrofit and parts business, which offer clients the option of upgrading and improving auxiliary equipment requiring repairs or replacement - from filter houses to exhaust silencers and stacks, diverter dampers, and a complete line of in-duct products. "This aftermarket and retrofit operation will add a new dimension to INNOVA's product and service offering which we plan to support

with our in-house construction group and grow into a much larger business," Mr. Wong said.

The Braden transaction, follows INNOVA's acquisition earlier this year of the liquidated intellectual property assets of Express Integrated Technologies (EIT) a leader in Selective Catalytic Reduction Systems and Once Through Steam Generators (OTSGs).

About Braden:

Braden, headquartered in Tulsa, Oklahoma, and Heerlen, the Netherlands, is an international leader in the power generation industry for the design, manufacture, installation and retrofit of auxiliary equipment for gas turbines including filter houses, inlet cooling systems, anti-icing systems, intake silencers, expansion joints, diverter dampers, exhaust silencers, exhaust stacks and Selective Catalytic Reduction systems.

Its in-house engineering capabilities also include: 3-D solid modeling of complex shapes; computational fluid dynamics; structural design analysis; thermal, buckling and vibration frequency analysis; finite elemental analysis; and acoustical testing and analysis.

The company was founded in 1923 by Glenn T. Braden and now has more than 160 employees with specialized engineering staff in the United States and the Netherlands, and relationships with fabrication specialists in over 30 countries. Consolidated Fabricators has been in business since 1971 and operates 50,000 square feet of office and manufacturing space in Auburn, Massachusetts.

About INNOVA Global:

INNOVA Global, formerly ATCO Emissions Management, ATCO Noise Management and Higgott-Kane, is an international, fully integrated engineering, fabrication, procurement and construction management company that primarily serves clients in the power generation, oil and gas, petrochemical and industrial sectors. Over the past four decades, the company has developed a full-service suite of specialized solutions involving air and noise emissions control, acoustic consulting, gas turbine auxiliary systems, heat recovery systems, oil and gas facilities, and turnkey buildings.

INNOVA Global has offices throughout North America and overseas, with in-house fabrication facilities in Monterrey, Mexico and St. George, Utah.

About TriWest Capital Partners:

TriWest Capital Partners is a major shareholder of InnoVa Global. Founded in 1998, TriWest Capital Partners is one of Canada's leading private equity firms with over \$1.25 billion of committed capital. Based in Western Canada, TriWest makes significant investments in established, well-run companies with a proven track record of success and a sustainable competitive advantage, with experience in a broad range of industries, including the service,

manufacturing and distribution sectors. The TriWest team consists of a group of professionals with significant operational, financial and transactional experience. TriWest works closely with management and Limited Partners, proactively putting in place a strategy that maximizes growth potential and value creation by emphasizing operational excellence and an efficient capital structure.
